## Introduction

Thank you for your interest in **JSN Ferado** template. We really appreciate your choice and truly hope our product will bring more value to your website and business.

To have the best template understanding, we recommend you read the documentation in the following order:

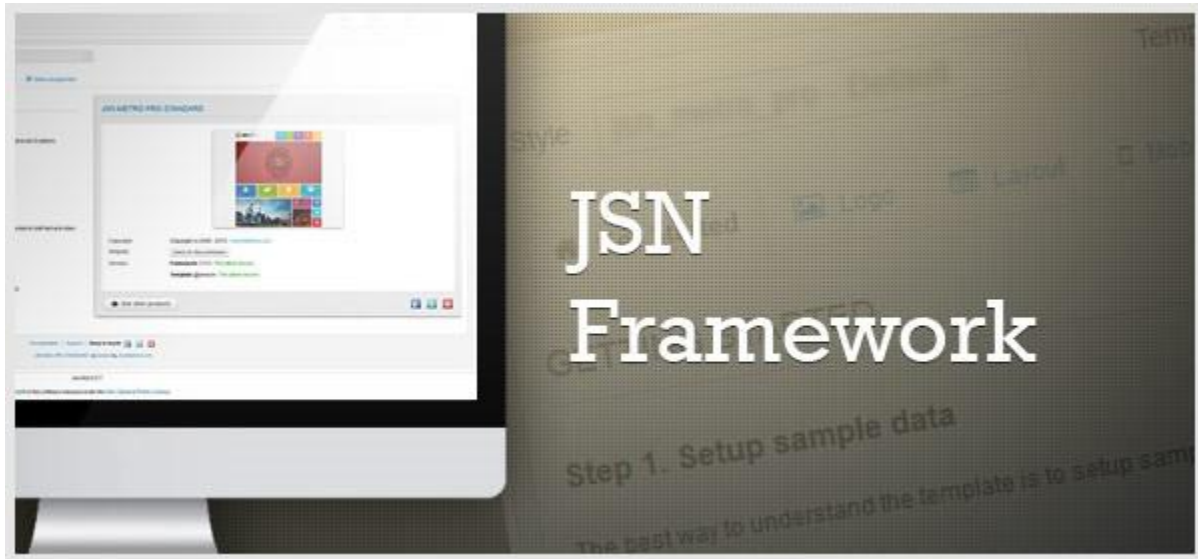

1. **JoomlaShine Template Configuration Video** – a short video tutorial about the fast way to learn JSN Ferado template. [Click here](#) to see the video tutorial.
2. **JSN Ferado Configuration Manual** - This document will give detailed information about each template feature and how to apply it to your real website.
3. **JSN Ferado Customization Manual** - This document will show you how to customize the template to.

You can print all documents for convenient reading.

### Attention!

Features marked with **PRO** are available only in **JSN Ferado PRO Edition** and are NOT available in **Free Edition**.

## JSN Template Framework

JSN Ferado as well as all other Joomla templates from JoomlaShine is built based on **JSN Template Framework** – A clever template control system. Currently, it utilizes Bootstrap to provide users an intuitive interface. JSN Template Framework will be installed automatically when you install JSN Ferado.

There are a lot of features in JSN Ferado come from JSN Template Framework: Sample data installation, files modification checking and more. To learn more about it, please check [blog posts about JSN Template Framework on JSN blog](#).

You can update it whenever a new framework version is released. For more details, please check the section [Template Information & Auto Update notification](#)

### *JSN Ferado theme for Kunena*

After purchasing **JSN Ferado template**, you can download **JSN Ferado theme** at the Customer Area. This theme helps you build a nice forum easily.

## RTL Support

To set RTL support to Kunena, you just need to add **&jsn\_setdirection=rtl** to the end of the website address. Then, add **&jsn\_setdirection=ltr** to switch it to normal layout.

The screenshot displays the Joomla! JSN Ferado template interface. At the top, there is a red navigation bar with a search icon, a magnifying glass, and menu items: EXT.STYLES, JOOMLA, FEATURE, DESIGN, HOME. The 'ferado CLOTHING' logo is on the right. Below this is a black navigation bar with 'Search Topics', 'General Statistics', 'Recent Topics', and 'Kunena Category'. A white login box contains a 'Welcome, Guest' message, a 'Login' button, a 'Remember me' checkbox, a password field (masked with dots), a 'demoadmin' username field, and links for 'Forgot your password?' and 'Forgot your username?'. Below the login box is a 'Kunena Forum' section with a 'Go' button and a 'Board Categories' dropdown. The main forum section is titled 'Main Forum' and contains a table of forum posts.

*After enabling CSS/JS compression*

See other FREE Hi-Quality Joomla Templates: <http://www.joomlashine.com/free-joomla-templates.html>

This feature significantly reduces http request number to server as well as overall loading size, which results in 35% performance boost. For more information, please read the section **Compress CSS/JS** in this document.

**Read more:** Section [CSS/JS Compression](#)

## Native RTL support

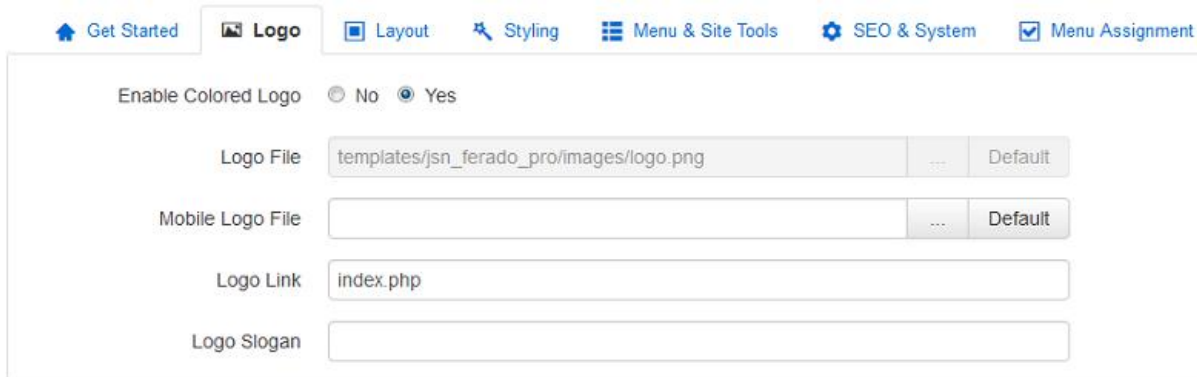

### *Right to Left JSN Ferado layout*

All JoomlaShine templates are equipped with **native RTL support**. We spent a huge amount of time tweaking every tiny detail of the template to make it look absolutely awesome in the RTL mode. Everything is horizontally-flipped including the dropdown main menu and side menu.

You don't have to do any additional template configuration to enable the RTL mode. Just set some RTL language in Joomla! Administration and our template will automatically detect and enable the RTL mode.

## Multilingual support

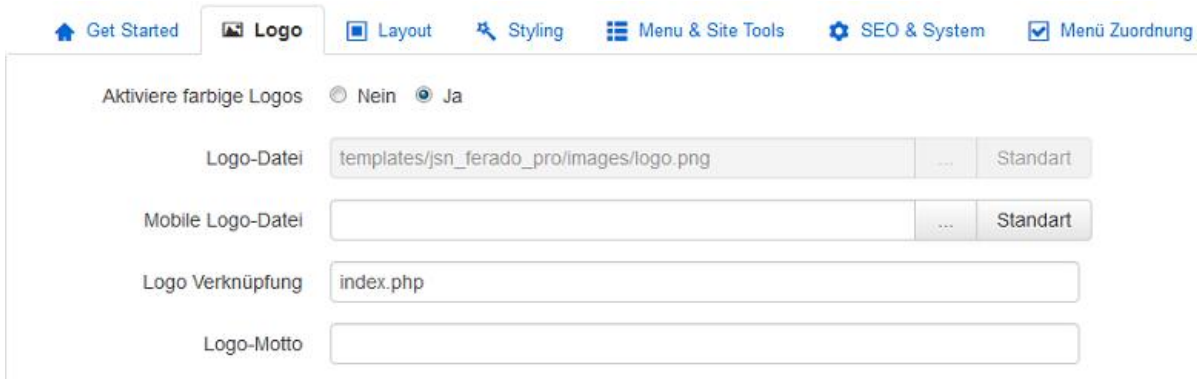

In JoomlaShine.com templates, all the wording of both back-end and front-end are moved to separate language files, so you can easily translate them into any language you want. Currently our templates support **14 primary languages** with more to come in the future.

The screenshot shows the Joomla! configuration interface for the English language. The top navigation bar includes: Get Started, Logo (selected), Layout, Styling, Menu & Site Tools, SEO & System, and Menu Assignment (checked). The main content area is titled "Logo" and contains the following settings:

- Enable Colored Logo:  No  Yes
- Logo File:  ... Default
- Mobile Logo File:  ... Default
- Logo Link:
- Logo Slogan:

### *English language*

The screenshot shows the Joomla! configuration interface for the German language. The top navigation bar includes: Get Started, Logo (selected), Layout, Styling, Menu & Site Tools, SEO & System, and Menü Zuordnung (checked). The main content area is titled "Logo" and contains the following settings:

- Aktiviere farbige Logos:  Nein  Ja
- Logo-Datei:  ... Standart
- Mobile Logo-Datei:  ... Standart
- Logo Verknüpfung:
- Logo-Motto:

### *German language*

For more information about supported languages, please read section **Multilingual support** in this document.

**Read more:** Section [Multilingual support](#)

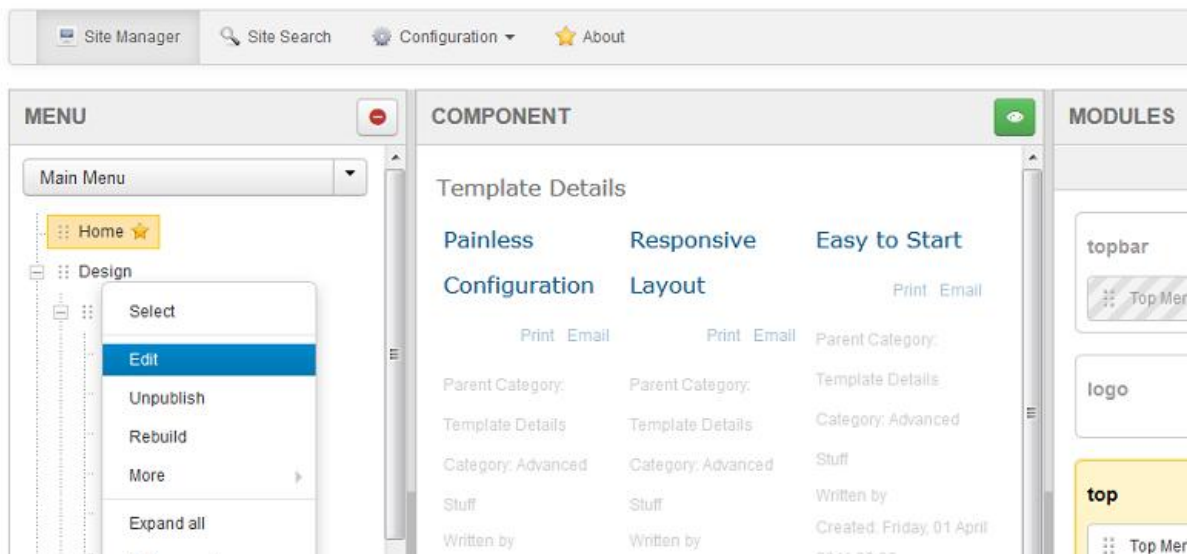

## Free Extensions

### JSN PowerAdmin – Joomla Admin made easy

JSN PowerAdmin makes your Joomla administration process easy and enjoyable. It allows you to have full control over your Joomla website in a single screen. You can manipulate elements by using an intuitive GUI with drag-n-drop operations.

Main features of JSN PowerAdmin:

- Search any items quickly in back-end with **Spotlight Search**
- Control the website content in one place with **Site Manager**

*JSN PowerAdmin is totally FREE!*

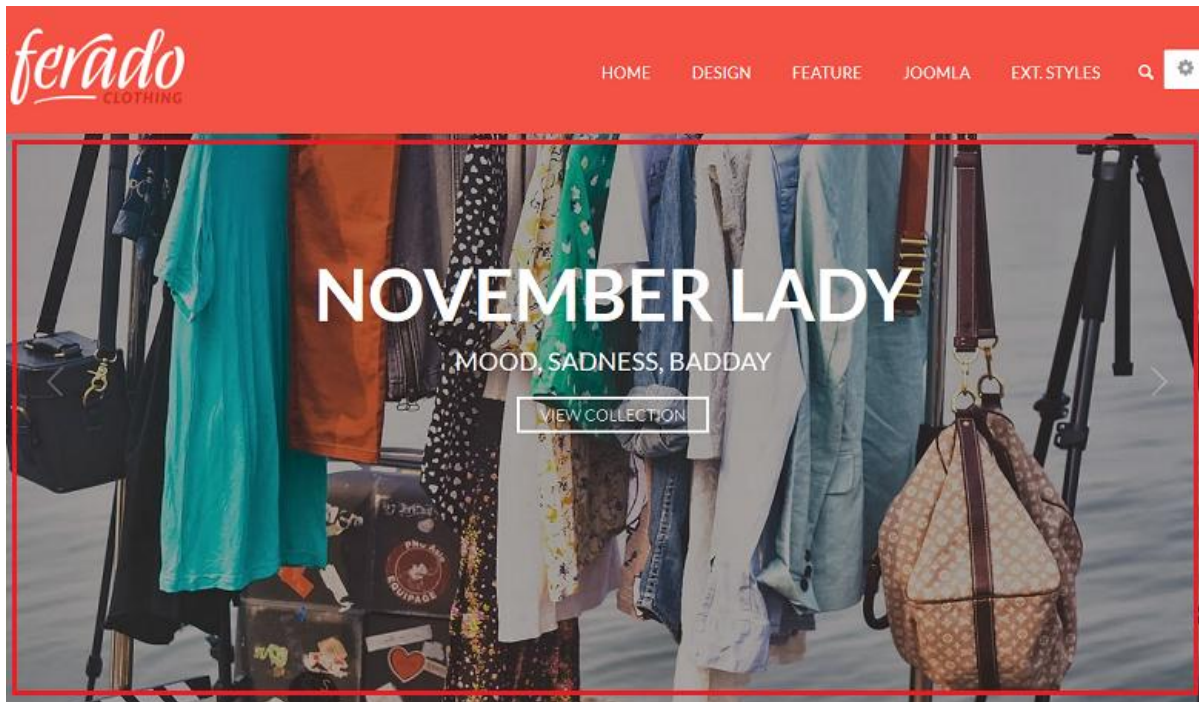

[VIEW DEMO](#) – [DOWNLOAD JSN POWERADMIN](#)

## JSN ImageShow – Stunning Joomla gallery

The image gallery you see on our demo website is another cool product **JSN ImageShow** from JoomlaShine.com. This product is shipped with component, module and content plug-in so that you can present a gallery anywhere on every website. The image gallery works normally on desktop and mobile devices.

### Presentation as module

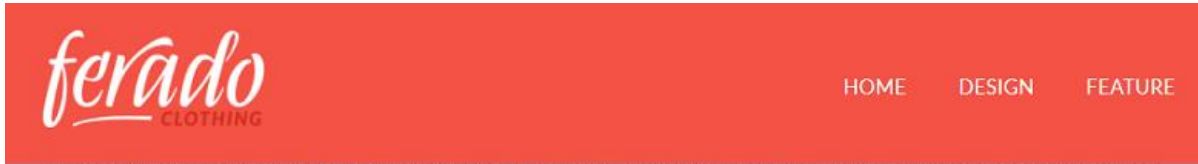

Here you can see how JSN ImageShow is presented as a slideshow module in position **promo**. The theme **Slider** is implemented in JSN Ferado demo site.

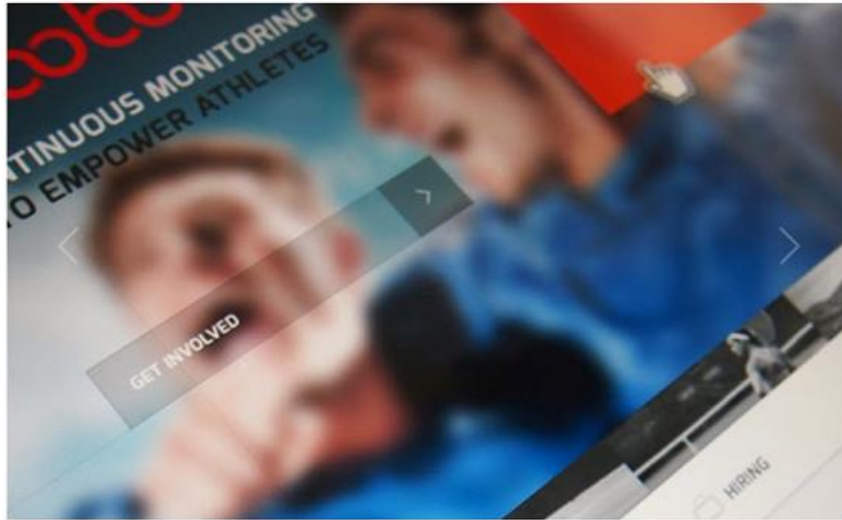

*JSN ImageShow presented as slideshow module*

## Presentation as plugin

Here you can see how JSN ImageShow is presented as full-featured gallery with thumbnails inside the article.

Currently, JSN ImageShow comes with 6 themes: Theme Classic, Theme Slider, Theme Grid, Theme Carousel, Theme Strip and Theme Flow. More themes will be released in the future.

*JSN ImageShow with Theme Classic*

*JSN ImageShow presented as gallery in main body content*

JSN ImageShow is NOT included in the template package, but you can download it separately **for free**.

[VIEW DEMO](#) – [DOWNLOAD JSN IMAGESHOW](#)

## JSN UniForm – Easy Joomla form builder

JSN UniForm will bring you the new indulgence since you find out it is the easiest-to-use form extension for your site. Contact us, survey and job application are just some of thousand forms that this single extension can help you to create and control.

Besides the intuitive **drag-n-drop operation**, **flexible form presentation** and **multiple pages layout**, JSN UniForm also assists you to deeply understand your collected data with the multiple admins email notification, clean result display or submission filter.

The image shows a survey form titled "JoomlaShine Template Survey". The form includes a thank-you message, a section for identifying the user, and a section for Joomla experience. The user identification section has four radio button options: "Individual building website for himself", "Freelancer building websites for clients", "Web Agency", and "Others". Below these options is a text input field with a small icon in the bottom right corner. The Joomla experience section has three radio button options: "Less than 1 year", "1-3 years", and "More than 3 years".

*A survey created by JSN UniForm*

JSN UniForm is NOT included in the template package, but you can download it separately **for free**.

[VIEW DEMO](#) – [DOWNLOAD JSN UNIFORM](#)

## Getting Started

### Template installation

After downloading, you should have a template installation file called **jsn\_ferado\_XXX\_Z.Z.Z\_install.zip**, where:

1. **XXX** is the template edition. It can be **free** or **pro**.
2. **Z.Z.Z** is the template version.

This is a standard Joomla! Template installation file, which can be installed in Joomla! Administration as usual.

Here are quick instructions to remind you:

1. In Joomla! Administration, go to menu **Extensions** => **Extension Manager**
2. Once you are on **Extension Manager**, click **Browse** button and select template installation file **jsn\_ferado\_XXX\_Z.Z.Z\_install.zip**. After that, click on button **Upload & Install**.
3. Installation file will be uploaded to your server and installed in Joomla!
4. Set the templates as default, go to menu **Extensions** => **Template Manager**

## Template Parameters

GETTING STARTED

**Step 1. Setup sample data**

The best way to understand the template is to setup sample data on your website to make it look the same as template demo website. There are 2 options:

- Install Sample Data**  
Install everything directly on this website. All current data will be lost.
- Download QuickStart package**  
Download the package and process it as standard Joomla website package you downloaded from Joomla.org

**Step 2. Check documentation**

Now, when the sample data installed, it's about time to take a look at template documentation and start exploration. Documentation is provided in both text and video formats.

- Watch configuration video**  
Watch a series of 10+ videos covering all template parameters.

**FERADO PRO UNLIMITED**

Copyright: Copyright (c) 2008 - 2013 - JoomlaShine.com

Integrity:

Version: Framework: 2.3.5 - [The latest version.](#)  
Template: 1.0.0 - [The latest version.](#)

### *Template parameters logically grouped in panels*

All JoomlaShine templates can be effortlessly configured by template parameters. In template setting page, there are **nearly 40 template parameters** arranged into logical groups for convenient operation.

To access template setting page, please take the following steps:

1. Go to the template manager by menu **Extensions** => **Template Manager**.
2. Click on template name **JSN\_Ferado\_XXX**, where XXX is the template edition you have.
3. Here in the **Template Edit** page, you will see the list of template parameters in section **Parameters**.
4. Click button **Save** to save all changes you've made.

## Template Information & Auto Update notification

**FERADO PRO UNLIMITED**

**Copyright:** Copyright (c) 2008 - 2013 - JoomlaShine.com

**Integrity:**

**Version:** **Framework:** 2.3.5 - **The latest version.**  
**Template:** 1.0.0 - **The latest version.**

In the first parameter, you can find important information about the latest template version. We really do treat our templates as a piece of software, which needs to be continuously improved. So you should always make sure you are using the latest version.

Also, in this section you can find some other relevant information such as **Author** and **Copyright**.

See other FREE Hi-Quality Joomla Templates: <http://www.joomlashine.com/free-joomla-templates.html>

JSN Ferado automatically checks the latest version available for **template version** and **framework version** to download.

1. If you want to update Framework only, click on the button **Update to Y.Y.Y** (Y.Y.Y is the latest framework version) which is next to the current framework version. After that a new modal window appears on your web browser, you click on the button **Update**, waiting for the update process, then click **Finish**.
2. If you want to update both framework and template, click on the button **Update to X.X.X** (X.X.X is the latest template version) which is next to the current template version. You fill in the JoomlaShine customer account and click on the button **Update**, waiting for the update process, and then click **Finish**.

JSN MICO PRO STANDARD

### Update Template to the latest version

This updater will guide you through the process of updating your template to the latest version.

**Important Information**

- All website content and template parameters remain the same after the update.
- If you made changes to template files, then you will have to port those changes to new template manually after the update process. Detailed instructions will be provided.

#### Enter JoomlaShine.com Customer Account

For verification, please enter the JoomlaShine customer account that you created when making purchase.

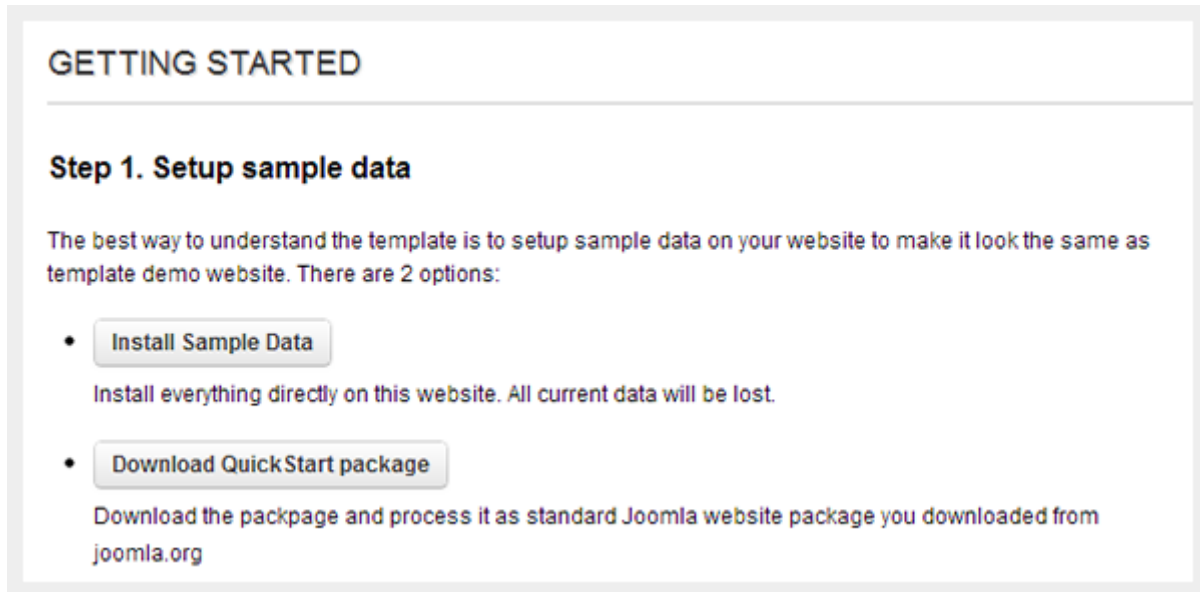

Username:  Password:

#### *Update template to the latest version*

After that the window about successful upgrade appears in your web browser.

Please note, if you customized the CSS files of original template, the changes would be lost. The best if you do backup the customized CSS files before the upgrade process.

## Sample Data Installation

All JoomlaShine templates have unique feature of installing sample data which makes your testing website look the same as on the template demo website. You can choose to install:

3. **Sample Data** – A light package with only JSN Ferado data. You install it on your available Joomla websites.
4. **QuickStart package** – It contains both the latest Joomla installation file and JSN Ferado data. You install this package normally as the flow to install Joomla. After that, you will get a totally new Joomla website with JSN Ferado template and its sample data.

See other FREE Hi-Quality Joomla Templates: <http://www.joomlashine.com/free-joomla-templates.html>

Below is the instruction to install **Sample Data** package:

1. First, go to the template settings page, at the parameter **GETTING START**, click **Install sample data** button.

### Install Sample Data

This installer will make your website looks the same as JSN Ferado PRO live demo website.

#### Important information

- Installing sample data will delete all data on this website.
- It is NOT recommended to install sample data on production website.

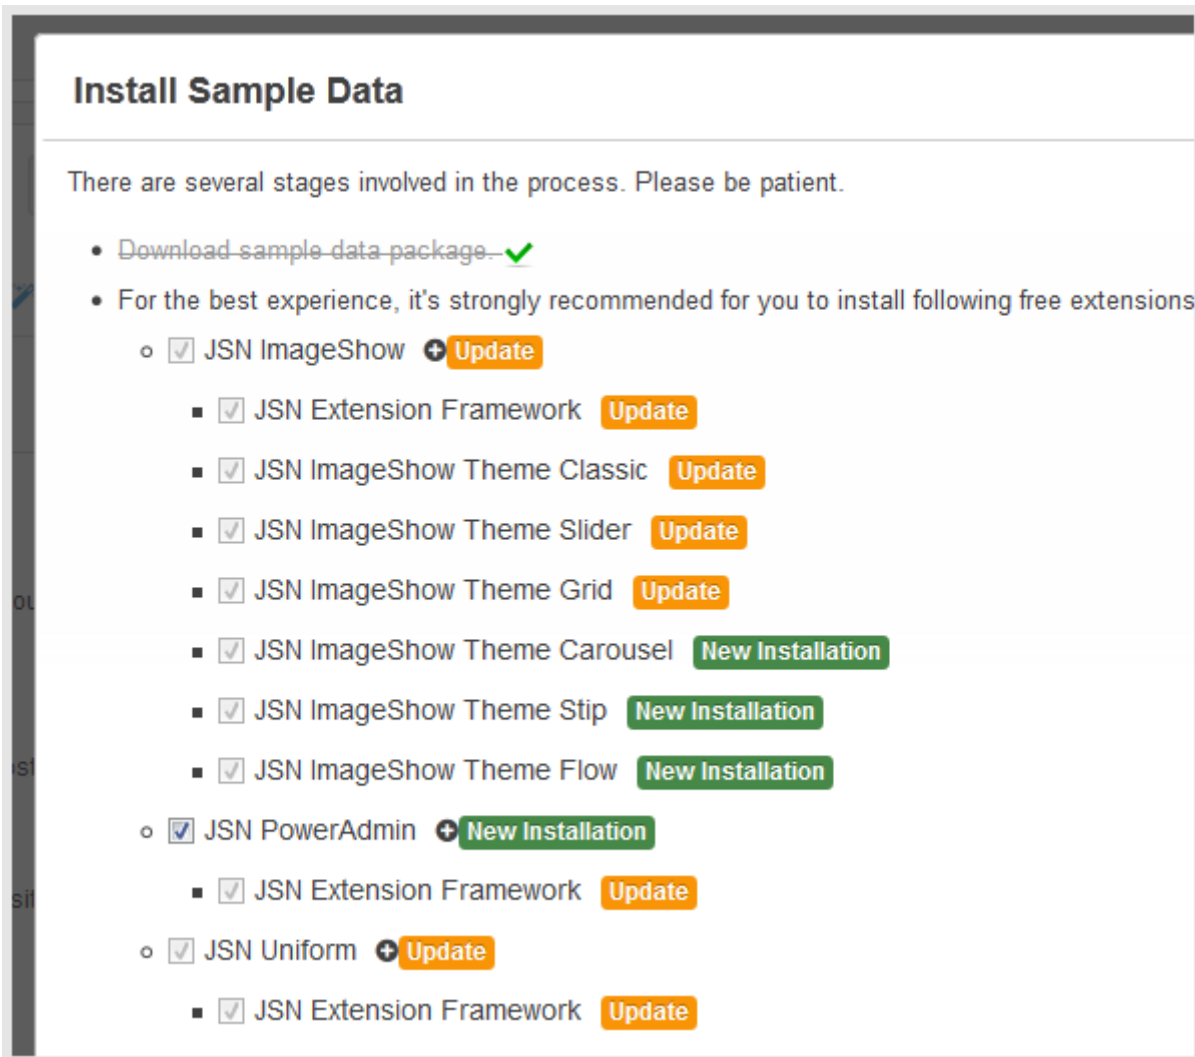

I agree that installing sample data will delete all content on this website

Install Sample Data

Cancel

See other FREE Hi-Quality Joomla Templates: <http://www.joomlashine.com/free-joomla-templates.html>

2. Next, on page **JSN Ferado Sample Data Installation** follow on-screen instruction to start the process.
3. **Download sample data package** of the demo website data such as: demo articles, demo menus, demo template settings, etc.
4. **Install free extensions:** JSN ImageShow, JSN PowerAdmin and JSN Uniform. You can install them or not.
5. **Install sample data:** this step will check the template version before installing the sample data.

### Install Sample Data

There are several stages involved in the process. Please be patient.

- ~~Download sample data package~~ ✓
- For the best experience, it's strongly recommended for you to install following free extensions
  - JSN ImageShow **Update**
    - JSN Extension Framework **Update**
    - JSN ImageShow Theme Classic **Update**
    - JSN ImageShow Theme Slider **Update**
    - JSN ImageShow Theme Grid **Update**
    - JSN ImageShow Theme Carousel **New Installation**
    - JSN ImageShow Theme Stip **New Installation**
    - JSN ImageShow Theme Flow **New Installation**
  - JSN PowerAdmin **New Installation**
    - JSN Extension Framework **Update**
  - JSN Uniform **Update**
    - JSN Extension Framework **Update**

See other FREE Hi-Quality Joomla Templates: <http://www.joomlashine.com/free-joomla-templates.html>

6. Finally, you should click the **Finish** button to **Return to template settings page** for further configuration.

## Install Sample Data

There are several stages involved in the process. Please be patient.

    - ~~JSN Extension Framework~~ ✓
  - ~~JSN Uniform~~ ✓
    - ~~JSN Extension Framework~~ ✓
- ~~Install sample data~~ ✓

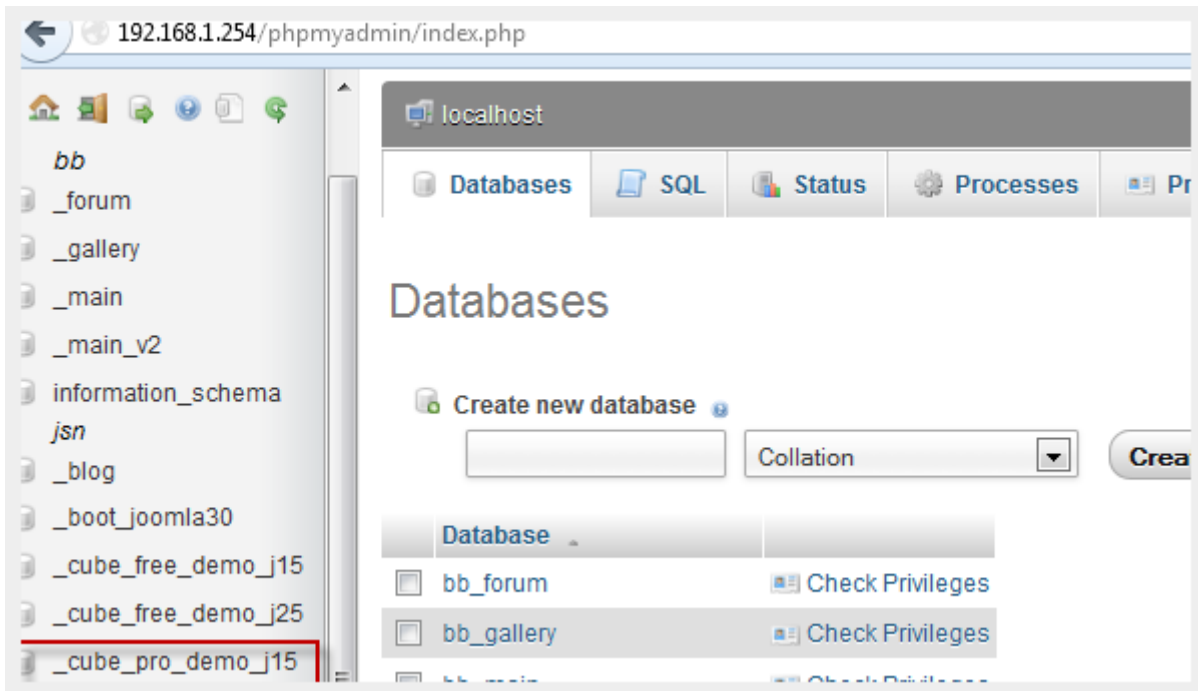

**Sample data is successfully installed**

## Original data restoration

Before the sample data installation process, all original data of your website is automatically backed up into a backup file located in folder **/backup** inside the **joomla\_root\_folder/templates/jsn\_ferado\_XXX/**, where **XXX** is the template edition on your server. Technically, this is the zip file, which contains a plain text file with SQL instructions that need to be executed on your Joomla! Database.

Below are the instructions on how to do that by using software phpMyAdmin 3.2.1.

1. First, login to phpMyAdmin and select your Joomla! database on the left column

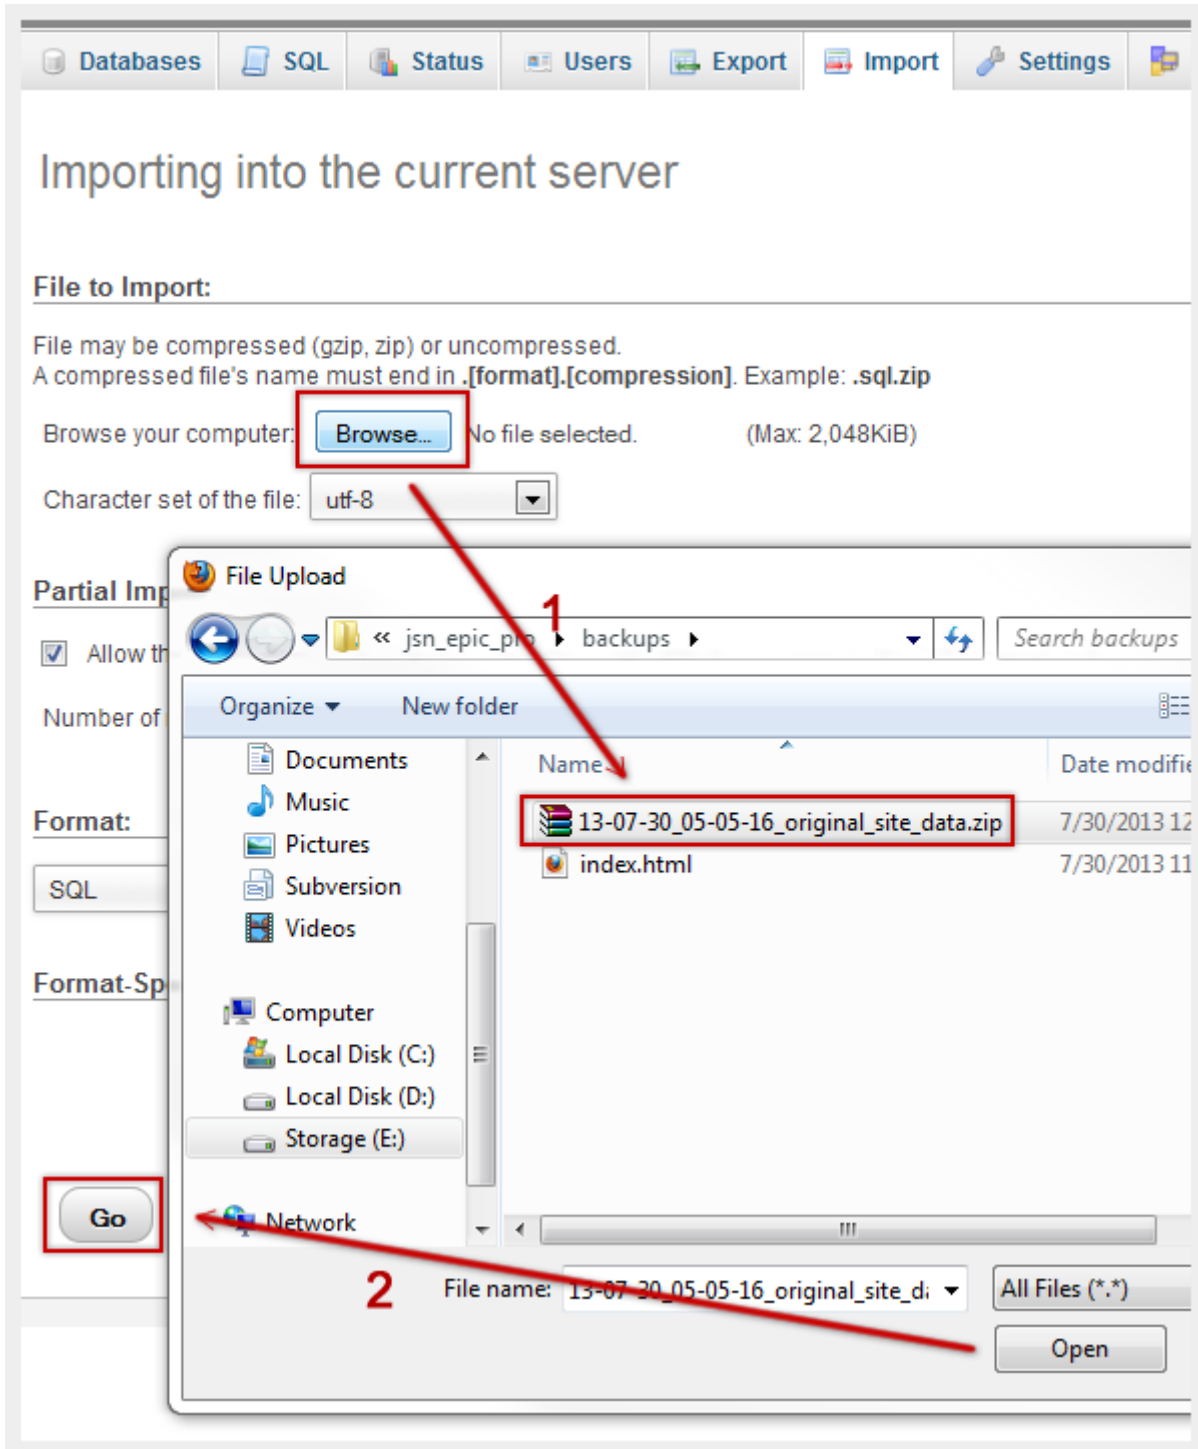

2. Next, select tab **Import** on the horizontal menu bar

3. Next, click button **Browse...**, then select the backup zip file and click button **Go** at the right corner of the page.

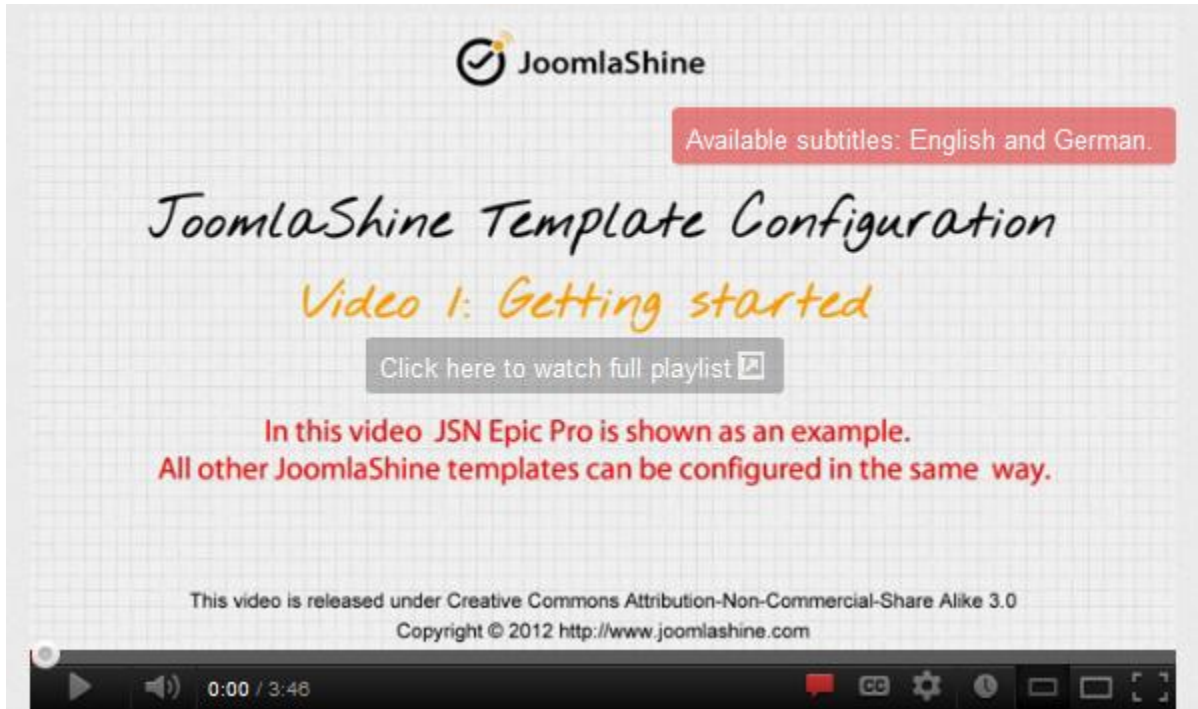

After script execution, you can get back to your website to check how the original data was restored.

## **Video tutorial**

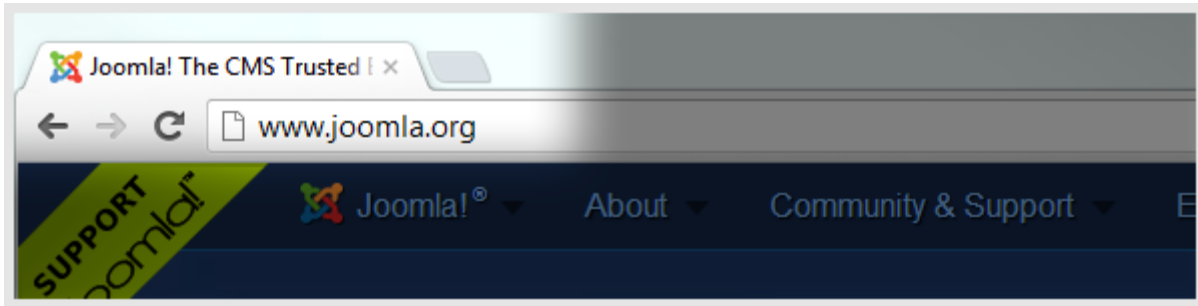

It guides you how to install a JSN template and sample data visually. Here are [video tutorials](#).

**JSN Epic** in the video is an example and these instructions can be applied to other **JSN templates** as well.

## Favicon configuration

Favicon is a small icon positioned on the left of the address bar of your browser. By default, Joomla! has an icon as shown on the screenshot below.

*Default Joomla! favicon*

On your website, you might want to use your own icon, like the one we are using on our site [joomlashine.com](http://joomlashine.com).

*JoomlaShine favicon*

Here are instructions on how to do that:

### Step 1: Create your own favicon file

Technically, favicon is a regular **16px \* 16px** icon file with exact name **favicon.ico**. In most cases, favicon is the sized-down version of the company logo saved in the icon format. In some cases, the logo is too specific and favicon needs to be built from scratch.

You can use some professional icon editor software like [Axialis IconWorkshop](#) and [Iconcool Editor](#) or to use [online favicon generators](#). The first method gives you better quality, but takes more effort. The second method is easier, but the quality is not the best.

### Step 2: Upload favicon file to your server

After you've got the favicon file, it's time to upload it to your server. You need to upload the icon file to template folder overwriting the default file. This is the folder **joomla\_root\_folder/templates/jsn\_ferado\_XXX/**, where **XXX** is the template edition.

See other FREE Hi-Quality Joomla Templates: <http://www.joomlashine.com/free-joomla-templates.html>

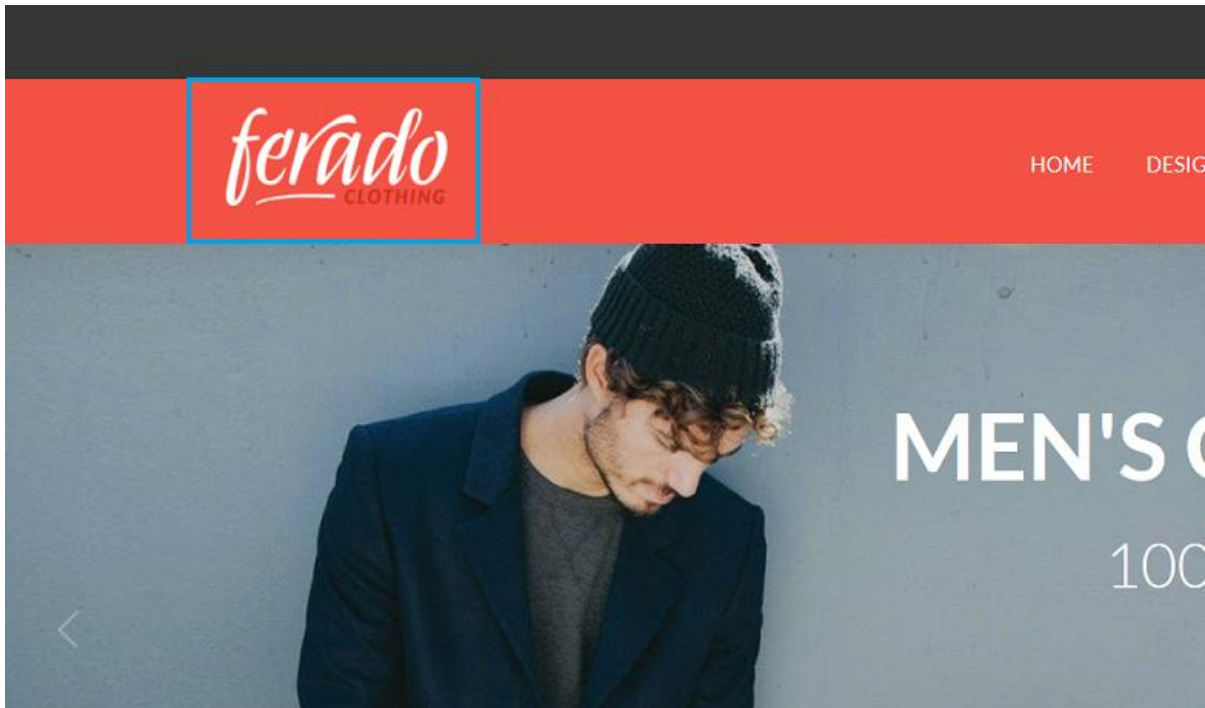

If you have permission problems while using FTP, then we strongly recommend you use a great Joomla! Extension called [eXplorer](#). And you don't need to declare logo width/height anywhere. Template will automatically present it as it is.

If you don't see your new icon, that doesn't necessarily mean you did anything wrong. Browsers are designed to customize data traffic, so they don't refresh the favicon every time they show a page. Even refreshing the page (**F5**) won't help. So you need to refresh more thoroughly:

- **Mozilla / Firefox / Safari:** hold down Shift while clicking Reload, or press Ctrl-Shift-R (Cmd-Shift-R on Apple Mac)
- **Internet Explorer:** hold Ctrl while clicking Refresh, or press Ctrl-F5
- **Konqueror:** simply click the Reload button, or press F5
- **Opera:** users may need to completely clear their cache in **Tools => Preferences**
- **Chrome:** Shift-F5

If this doesn't work, you will need to delete the temporary internet files and history and then open your page again.

## Logo

The logo **JSN Ferado** is the default sample logo and you should replace it with your own. Technically, logo is an image file called **logo.png** located in folder **joomla\_root\_folder/templates/jsn\_ferado\_XXX/images/**, where **XXX** the template edition you have.

You can manually choose your own logo file via template parameter **Logo File**. Additionally, you don't need to declare logo width/height anywhere. Template will automatically present it as it is.

A screenshot of the Joomla! configuration interface for the 'Logo' parameter. The interface has a top navigation bar with tabs: 'Get Started', 'Logo', 'Layout', 'Styling', 'Menu & Site Tools', 'SEO & System', and 'Menu Assignment'. The 'Logo' tab is active. Below the tabs, there are several configuration options: 'Enable Colored Logo' with radio buttons for 'No' and 'Yes' (selected); 'Logo File' with a text input field containing 'templates/jsn\_ferado\_pro/images/logo.png' and a 'Default' button; 'Mobile Logo File' with an empty text input field and a 'Default' button; 'Logo Link' with a text input field containing 'index.php'; and 'Logo Slogan' with an empty text input field.

*Parameters to set logo*

See other FREE Hi-Quality Joomla Templates: <http://www.joomlashine.com/free-joomla-templates.html>

When the logo file is ready, you can set up the following parameters:

1. **Logo File** - Select the image file you want to use as logo.
2. **Mobile Logo File** – Set specific logo for your website on mobile devices. Please leave this parameter empty if on mobile, you want to use the re-sized logo which is used on the desktop already.
3. **Logo Link** – Set URL where the logo image should link to. You can set here:
  - Absolute link like **<http://www.joomlashine.com>**
  - Relative link starting from Joomla! root folder like **[index.php](#)**

Leave this parameter empty if you do NOT want your logo to be clickable at all.

4. **Logo Slogan** – Set the slogan text to be inserted to the logo image attribute **alt**. Text in **alt** attribute is visible to screen readers (good for accessibility) and search engines (good for SEO).
5. **Enable Colored Logo** – Define if you want to use special colored logo for each template color. Colored logo file is located under folder **images/colors/{color\_name}/ inside the template folder**.

### Set up rich-media logo via module in position “logo”

JSN Ferado provides a module position called **logo**, where you can put any Custom HTML module with rich-media logo. Another advantage is that you can create multiple modules with different logos and display them in various pages using the menu-module assignment feature in Joomla!

### Attention!

If template detects that there are some module presented in position **logo**, then it will disable default logo with all logo parameters: **Enable Colored Logo, Logo File, Logo Link** and **Logo Slogan**.

## **Video tutorial**

It guides you how to configure logo visually. Here are [video tutorials](#).

**JSN Epic** in the video is an example and these instructions can be applied to **JSN templates** as well.

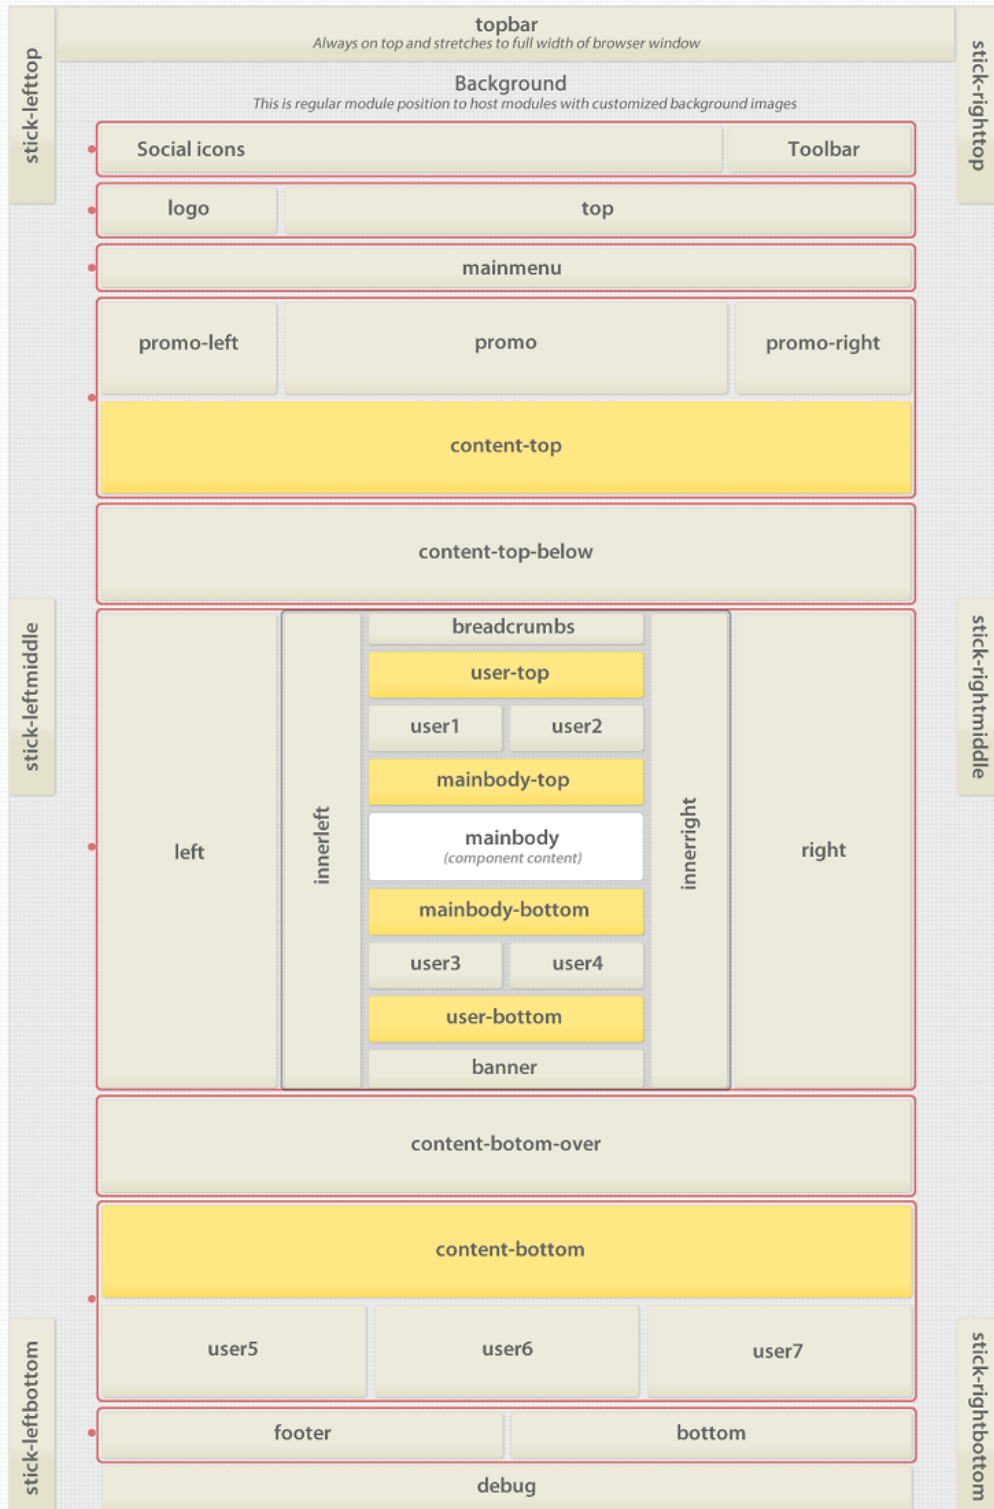

## Layout

### Module positions

JSN Ferado provides **38+ module positions** allowing you to have multiple layout configurations. All module positions are collapsible which means if you don't use all the positions they will be left as blank for neighboring modules.

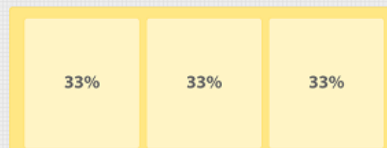

## JSN FERADO TEMPLATE FULL LAYOUT

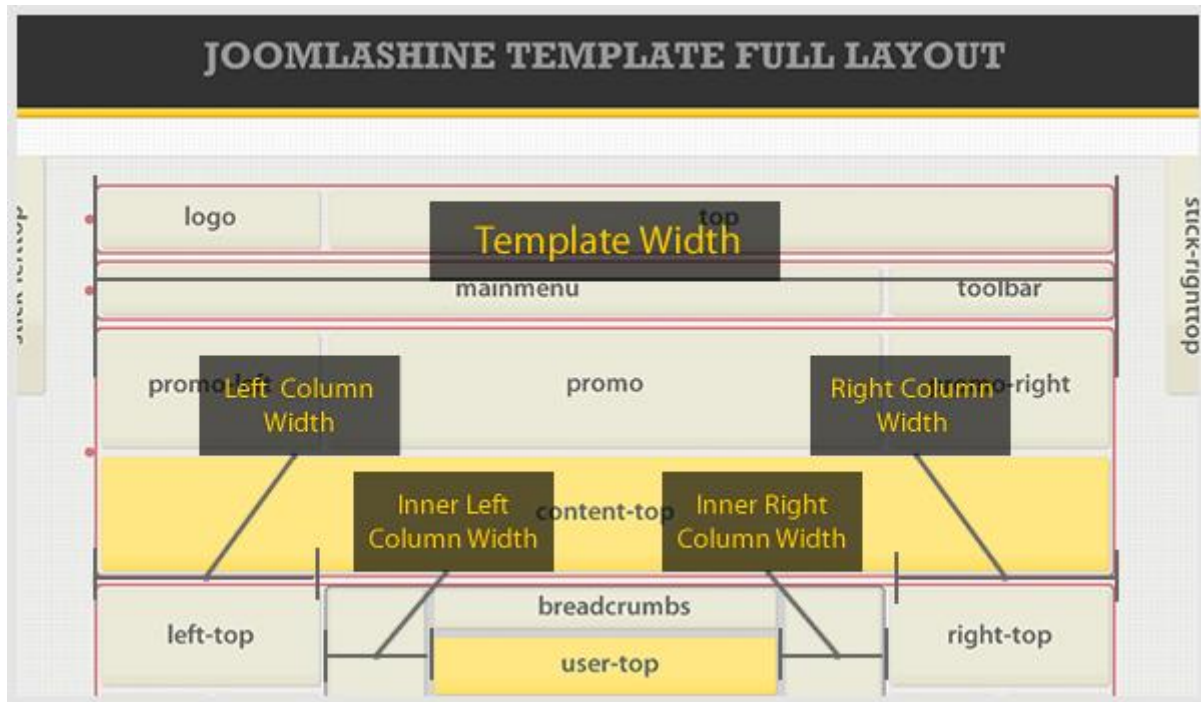

Position with modules arranged in **vertical** layout

Position with modules arranged in **horizontal** layout

## Layout dimensions

JSN Ferado allows you to change the width size of several critical layout elements. All settings can be done via template parameters in the section **LAYOUT SETTINGS**.

## Template Width

Template width can be configured in two different ways.

### Configuration by template parameter (lowest priority)

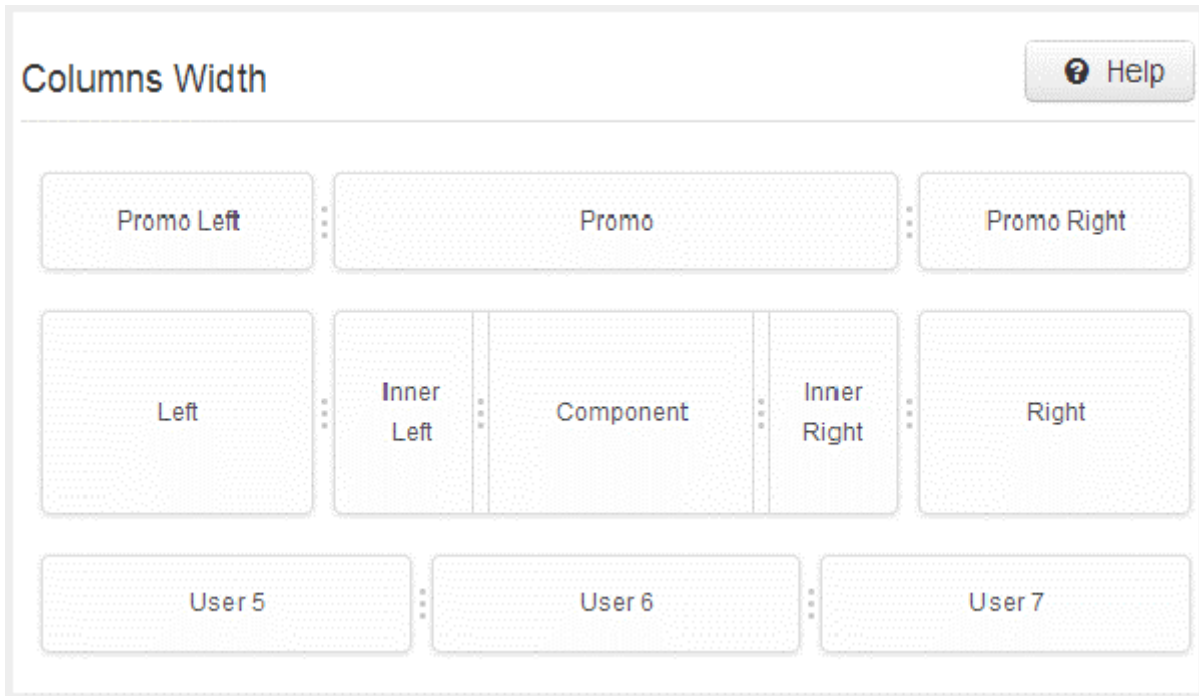

<p>Template Width Type <input type="text" value="Fixed"/></p> <p>Fixed Width <input type="text" value="960"/> <input type="text" value="px"/></p>	<p>Template width can be set by template parameter <b>Template Width Type</b>. There are three options for you to choose:</p> <ul style="list-style-type: none"><li>• <b>Fixed</b> – Template width is fixed in pixels defined in parameter <b>Fixed Width (px)</b>.</li><li>• <b>Float</b> - Template width is fixed in percentage defined in parameter <b>Float Width (%)</b>.</li><li>• <b>Responsive</b> - Template width fits into different resolution:<ol style="list-style-type: none"><li>a. <b>Mobile Device:</b> Template width fits into mobile devices - tablets and smartphones.</li><li>b. <b>Wide Desktop:</b> Template width fits into desktop with width display 1200 px and higher.</li></ol></li></ul> <p>This is the default setting and has the lowest priority.</p>
---	--

### Configuration by "Page Class" (higher priority)

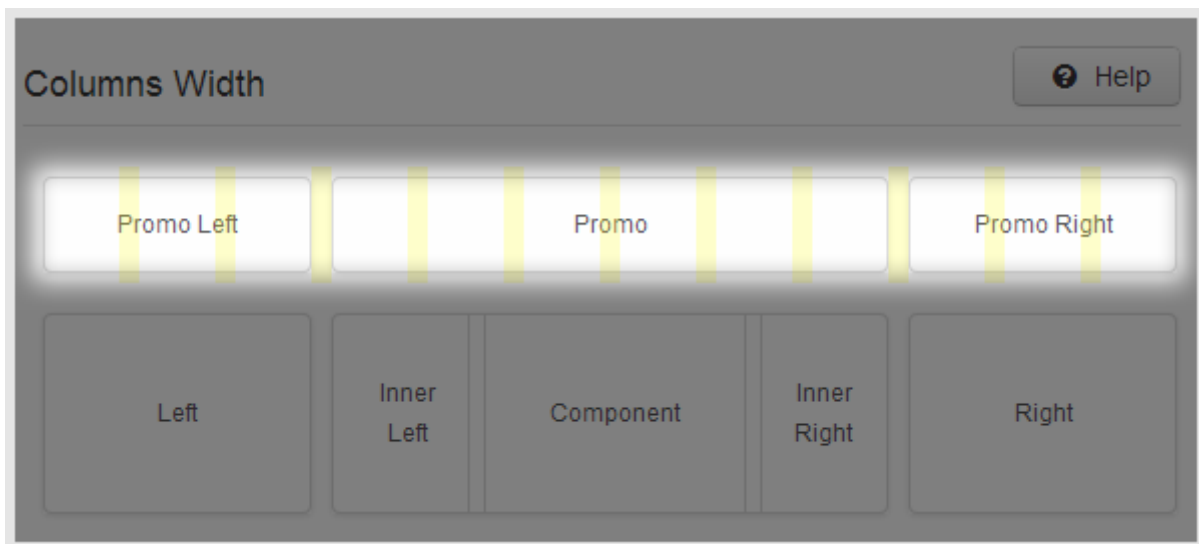

<p>Browser Page Title <input type="text"/></p> <p>Show Page Heading <input checked="" type="radio"/> No</p> <p>Page Heading <input type="text"/></p> <p>Page Class <input type="text" value="custom-width"/></p>	<p>Template width can be set by <b>Page Class</b> of a menu item with syntax <b>custom-width-xxx</b>, where <b>xxx</b> is the width value you choose.</p> <p>There are the following possible values: <b>fixed</b>, <b>float</b> and <b>responsive</b>. For example:</p> <ol style="list-style-type: none"><li>5. <b>custom-width-fixed</b></li></ol> <p>This setting will override the default settings by template parameter Template Width.</p>
--	--

## Columns Width and Position

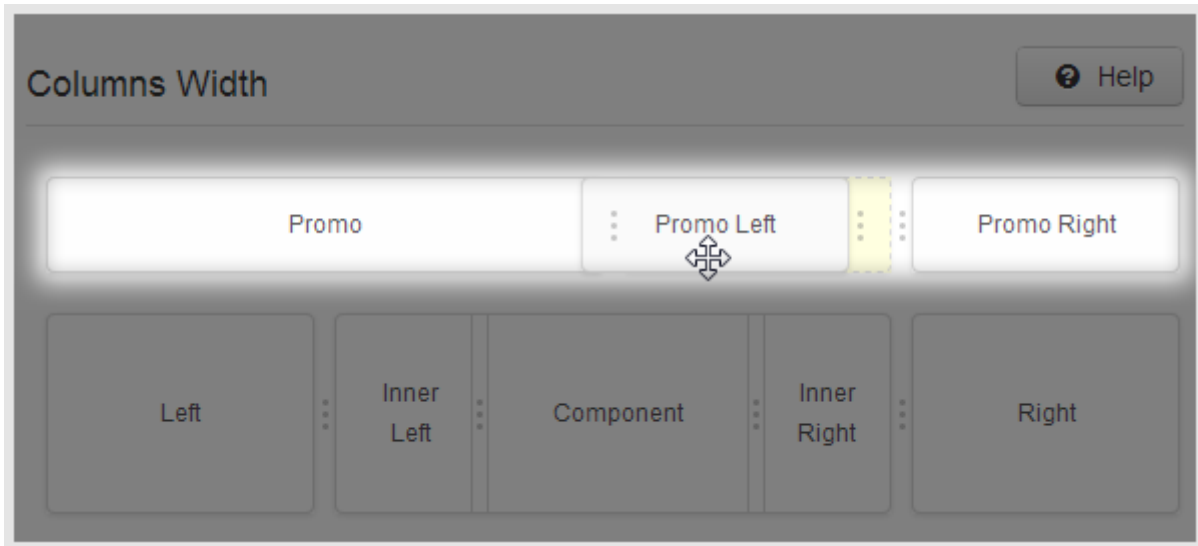

Thanks to the Bootstrap grid system, the layout is divided into 12 equal columns. Each module should take the width equal the columns number. You can drag and drop modules to adjust their widths and positions.

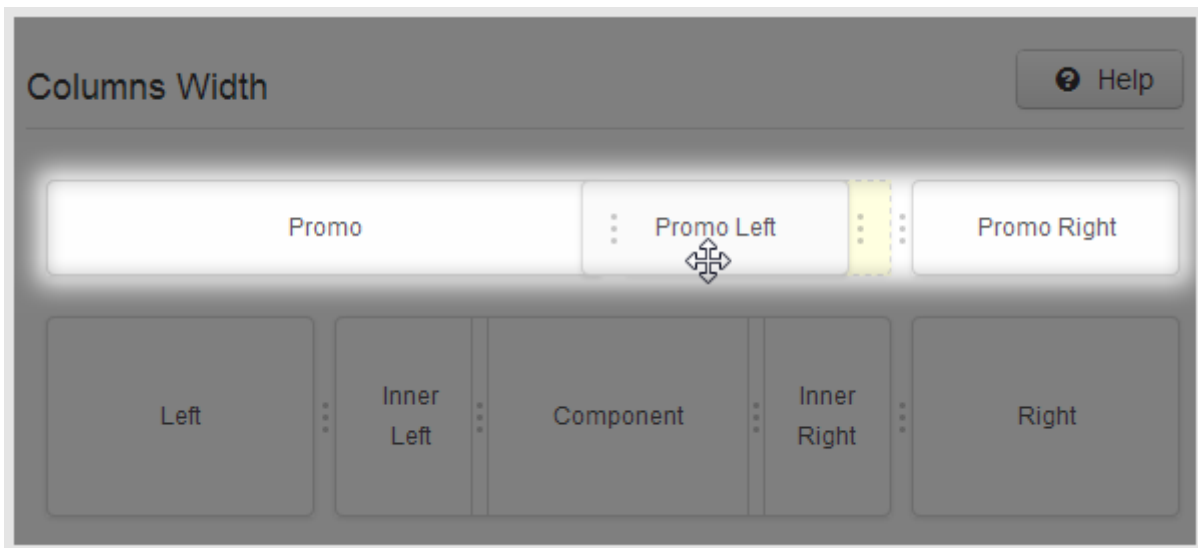

*Visual column widths and positions*

*12 Bootstrap grids*

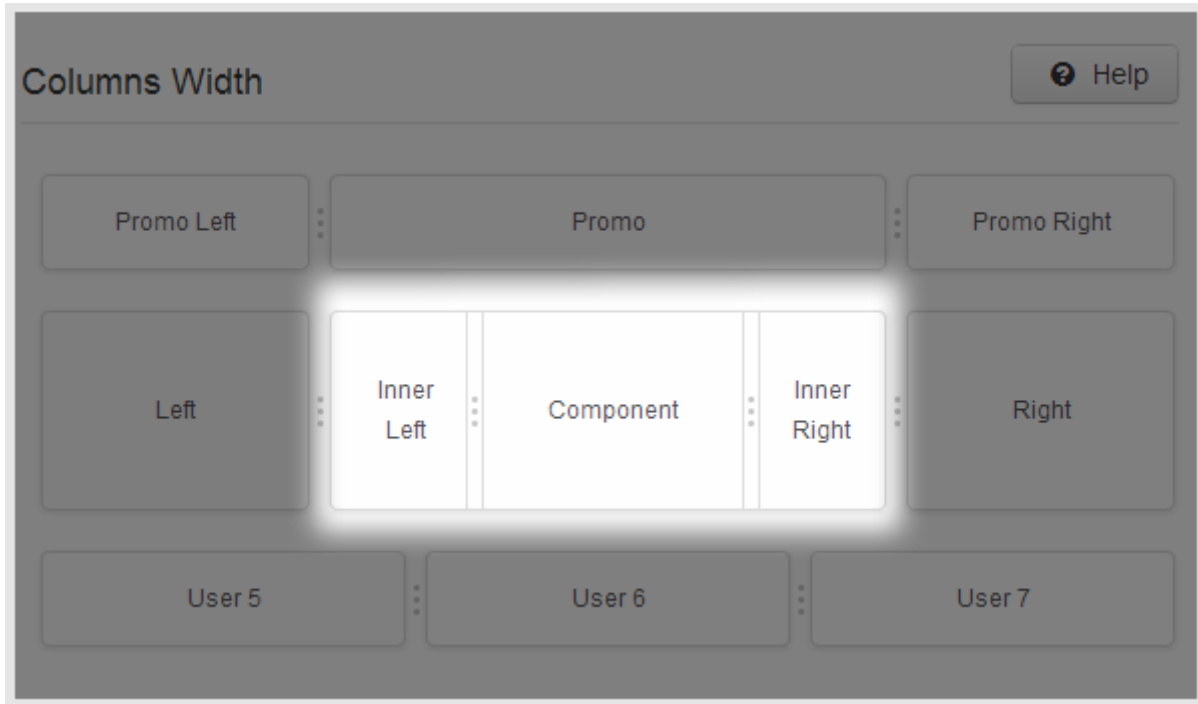

*Columns width adjustment*

*Columns position change*

See other FREE Hi-Quality Joomla Templates: <http://www.joomlashine.com/free-joomla-templates.html>

Please be aware that, you can adjust all the column widths and change almost all column positions. However, you are not allowed to change the positions of separate elements in the center block of “Inner Left”, “Component” and “Inner Right”.

*The center block “Inner Left”, “Component” and “Inner Right”*

## Stick Positions

The template layout includes 6 stick positions: **stick-lefttop**, **stick-leftmiddle**, **stick-leftbottom**, **stick-righttop**, **stick-rightmiddle** and **stick-rightbottom**. You can assign any modules or create custom HTML module into mentioned positions for better website presentation. The module “sticks” into your layout, so when you scroll mouse up and down, the assigned module is moved in appropriate direction.

Let’s see how we can create a custom HTML module then place it in the stick-lefttop position.

1. In Joomla Administration you go to **Extensions => Module Manager**
2. Click on a button **New** then choose **Custom HTML**
3. Fill the settings:
4. **Title:** My stick module
5. **Show Title:** No
6. **Published:** Published
7. **Position:** stick-lefttop
8. **Customer Output:** Type HTML code into this field

Above, we created a new module then assigned to the position stick-left-top. You can assign a module to the rest 5 stick positions.

## **Video tutorial**

It guides you how to configure layout visually. Here are [video tutorials](#).

**JSN Epic** in the video is an example and these instructions can be applied to **JSN templates** as well.

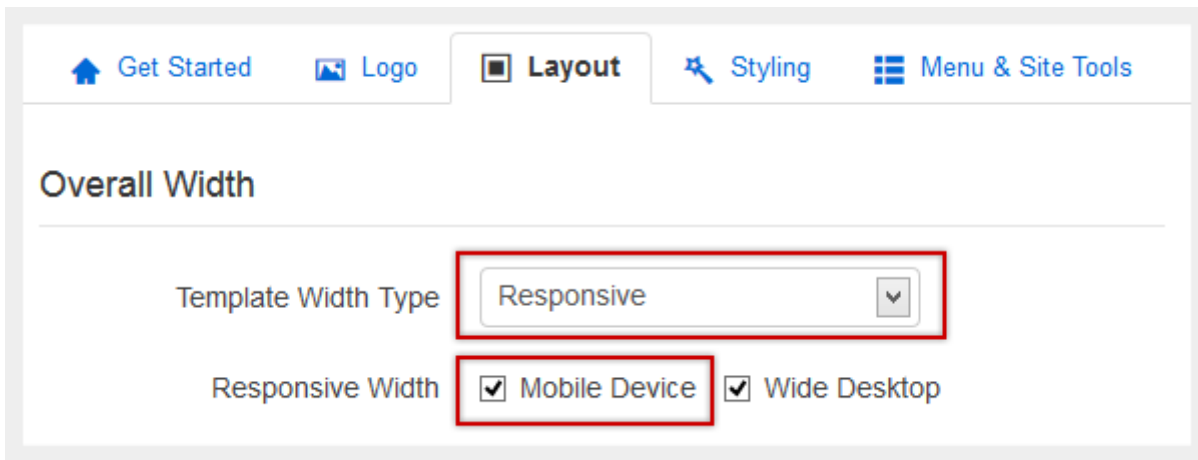

## Mobile settings **PRO**

All JoomlaShine templates are equipped with responsive design feature making your website look beautiful in mobile (both smartphones and tablets).

### Enable Mobile Support

To enable responsive design with mobile please set the parameter **Template width type** as **Responsive** and choose **Mobile Device** in parameter **Responsive Width**.

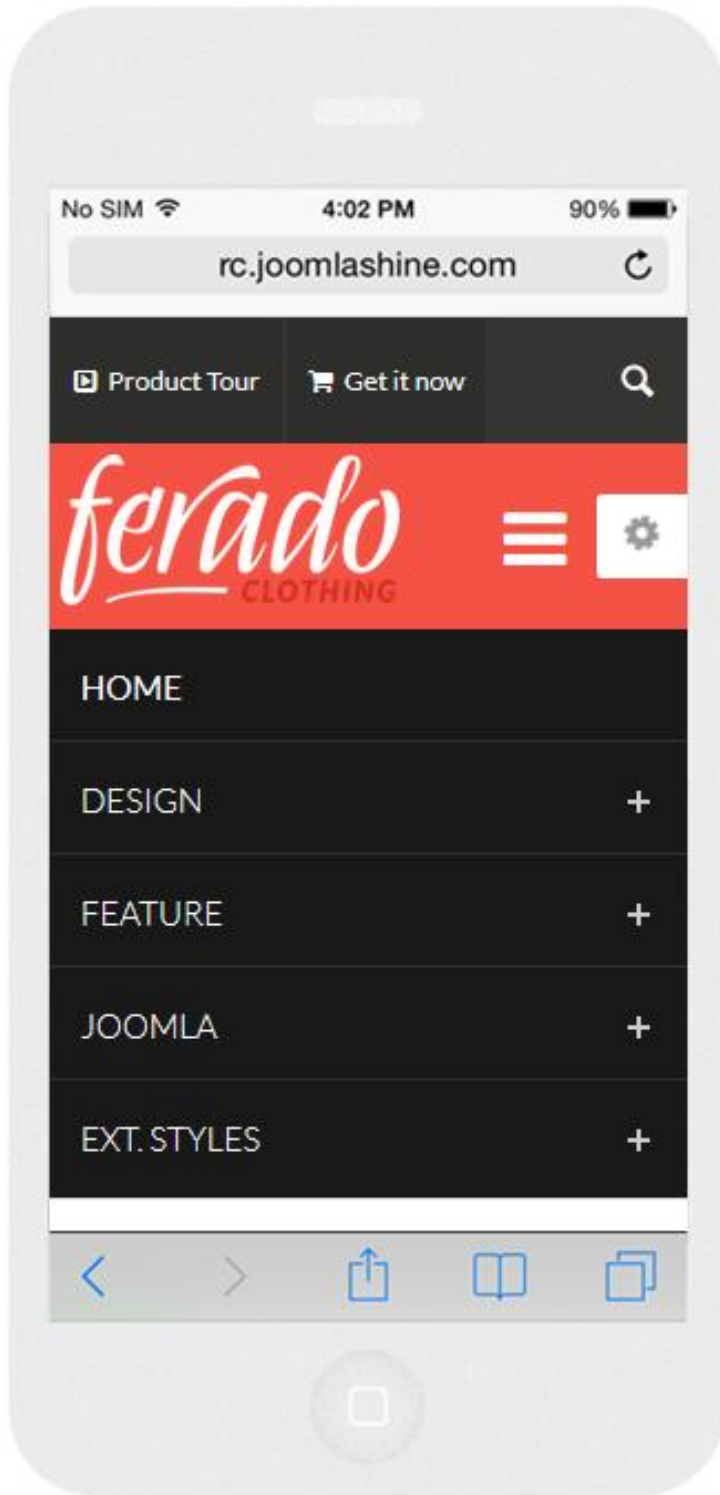

*Mobile settings*

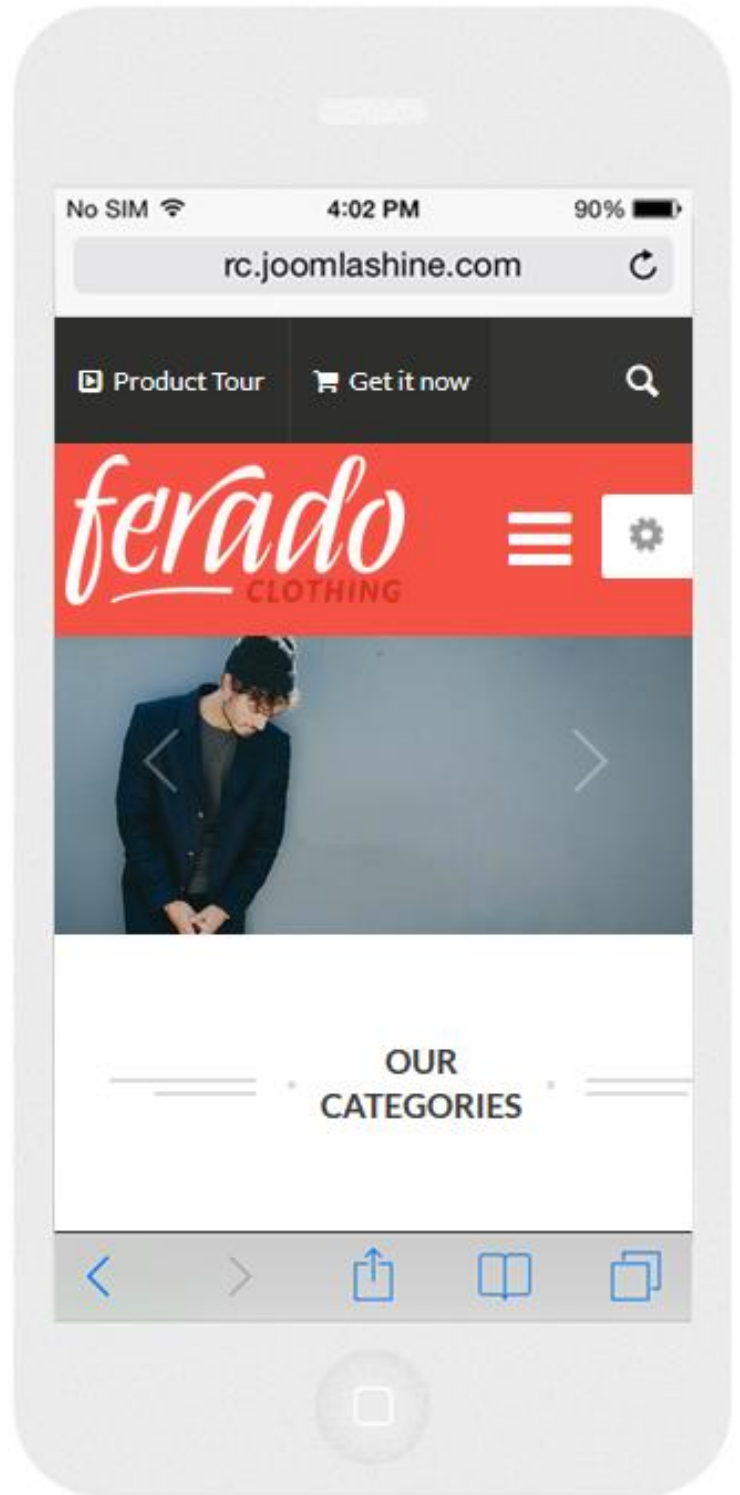

After that all modules will be automatically rearranged to fit different screen resolutions.

- If the client device is a smartphone like iPhone or Android-based phone, all content will be arranged in one column.
- If the client device is a tablet like iPad, Kindle Fire, etc. all content will be arranged in two or three columns.

Also, main menu will be transformed into compact dropdown menu.

*Opened mobile menu*

*1-column module*

As default, all modules will be displayed on both desktop and mobile. To display a module on only desktop or on only mobile, add **Module Class Suffix** parameter as following:

1. Display a module on only desktop: **display-desktop**

Module Menu Assignment **Module Permissions** Advanced

Alternative Layout

Module Class Suffix

2. Display a module on only mobile: **display-mobile**

Module Menu Assignment **Module Permissions** Advanced

Alternative Layout

Module Class Suffix

3. Display a module on only mobile: **display-tablet**

Module Menu Assignment **Module Permissions** Advanced

Alternative Layout

Module Class Suffix

4. Display a module on only mobile: **display-smartphone**

Module Menu Assignment **Module Permissions** Advanced

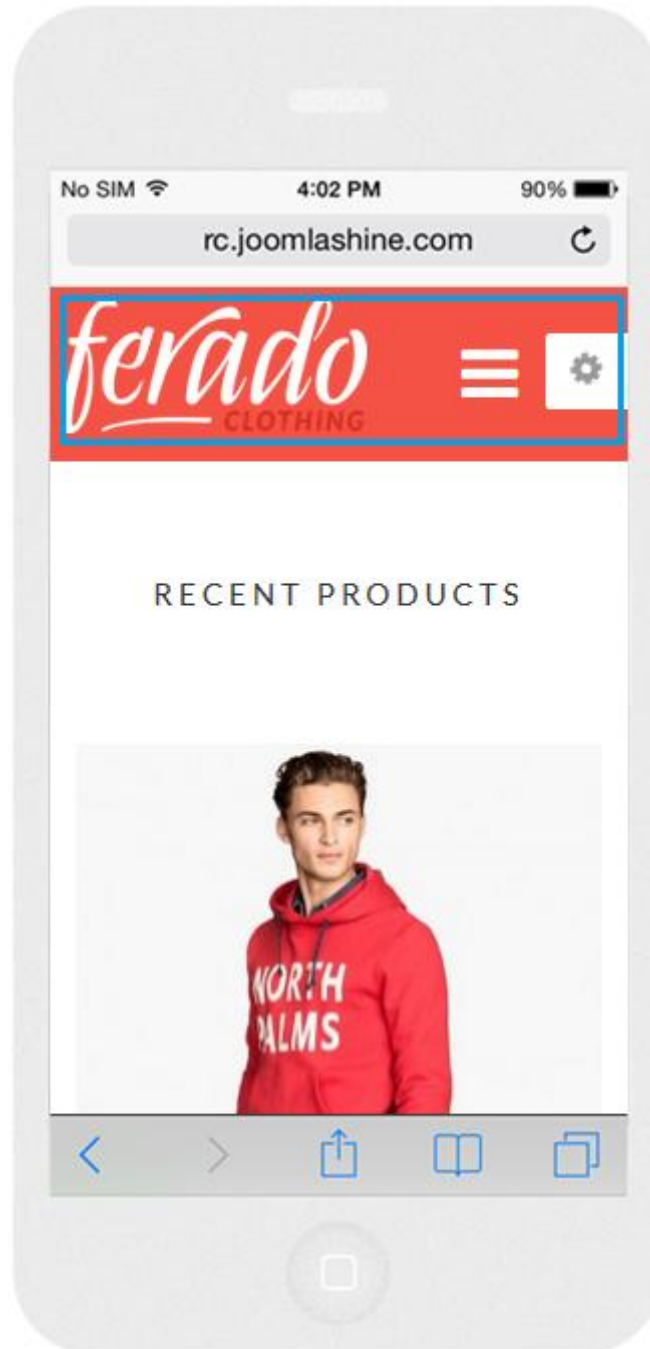

Alternative Layout

Module Class Suffix

## Enable Mobile Menu Sticky

With **Mobile Menu Sticky**, the menu will appear anytime. This will help you control all menus easily.

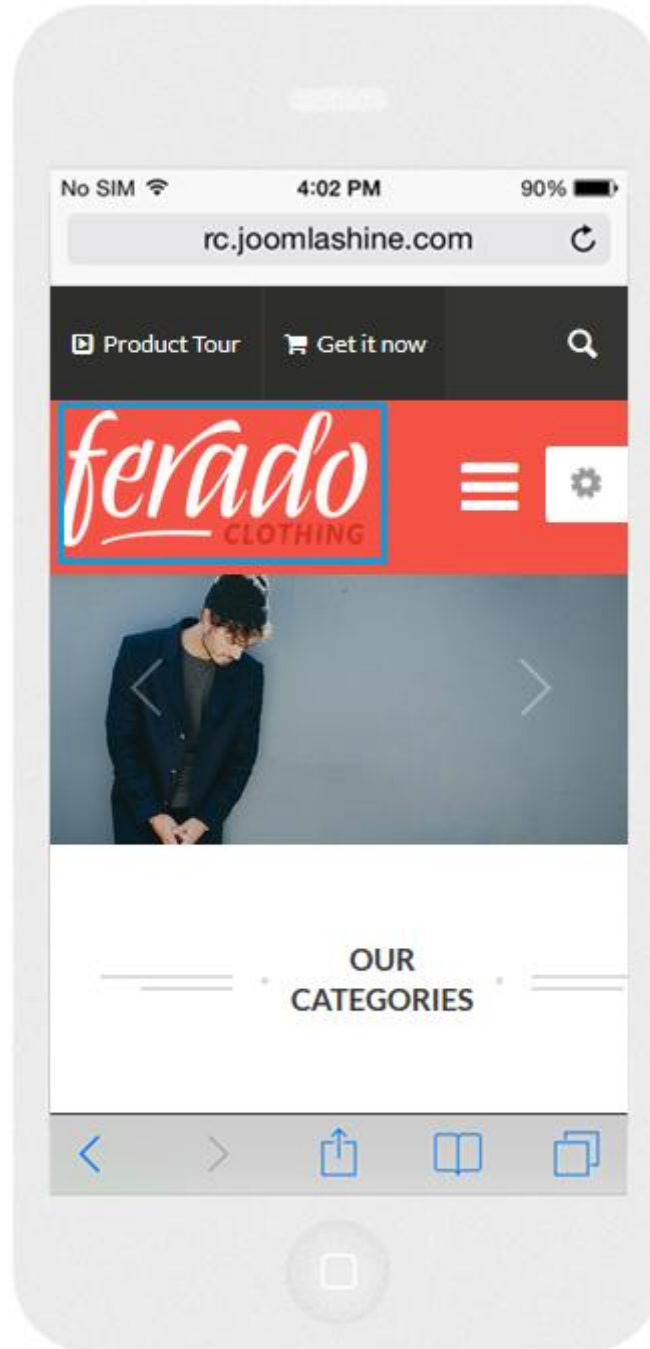

To enable this feature, in the section **Menu & Site Tools** -> parameter **Enable Sticky Menu** -> choose the option **Mobile**.

*Enable Mobile Menu Stick*

## Mobile Logo File

Normally, the default logo will be automatically resized and displayed nicely in mobile layout. But if you want to have specifically designed logo, then you can select it in the section **Logo** => parameter **Mobile Logo File**.

*Mobile Logo File*

## Colors Variation

### Template Color **PRO**

JSN Ferado provides **six major color variations** for you to choose from. Each color variation covers not only the main background, but also fills drop-down menu, links, table's header and some others.

All available colors are described below.

Home > Design > Color Variations > Blue Color

### Color Variations

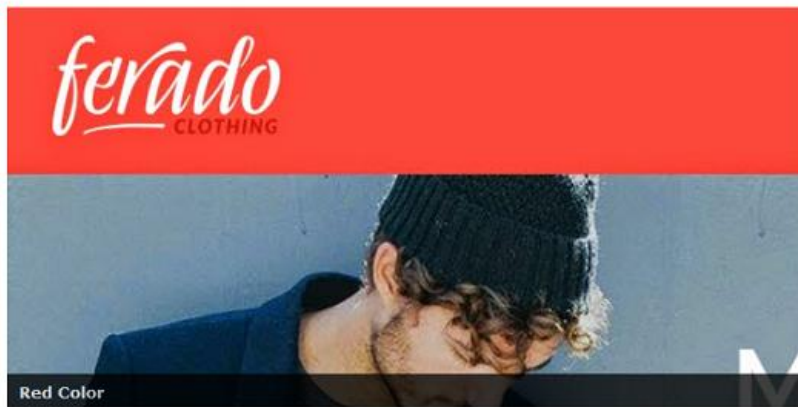

### Blue

Home > Design > Color Variations > Red Color

## Color Variations

### Red

Home > Design > Color Variations > Green Color

## Color Variations

### Green

Home > Design > Color Variations > Purple Color

## Color Variations

### Purple

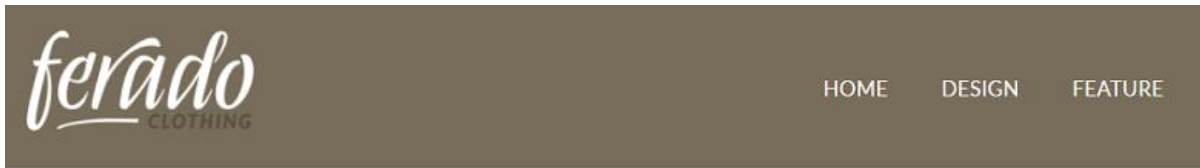

Home > Design > Color Variations > Yellow Color

## Color Variations

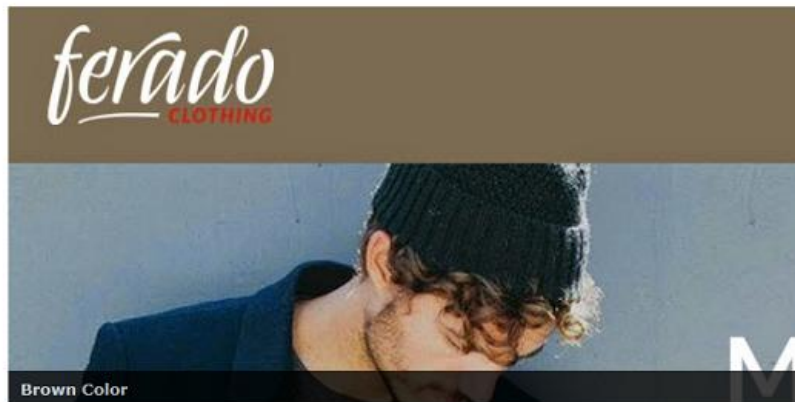

### Yellow

Home > Design > Color Variations > Brown Color

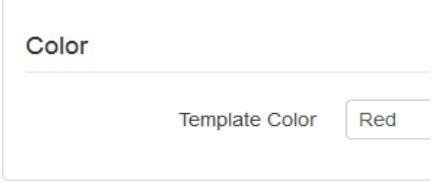

## Color Variations

## Brown

Template color can be configured in three different ways.

### Configuration by "Template Parameter" (lowest priority)

 <p>The screenshot shows a Joomla! configuration interface. At the top, there is a label 'Color' above a text input field. Below this, there is a label 'Template Color' followed by a dropdown menu currently displaying 'Red'.</p>	<p>Template color can be set by template parameter <b>Template Color</b> in <b>Styling</b> section.</p> <p>This is the default setting and has the lowest priority.</p>
--	---

### Configuration by "Page Class" (higher priority)

 <p>The screenshot shows two input fields. The first is labeled 'Page Heading' and is empty. The second is labeled 'Page Class' and contains the text 'custom-color-red'.</p>	<p>Template color can be set by <b>Page Class</b> of a menu item with syntax <b>custom-color-xxx</b>, where <b>xxx</b> is the color you want to have.</p> <p>There are the following possible values: <b>blue, red, green, orange, grey</b> and <b>violet</b>.</p> <p>For example:</p> <ul style="list-style-type: none"><li>• <b>custom-color-red</b></li></ul> <p>This setting will override the default settings by template parameter Template Color.</p>
--	---

### Configuration by Site tools panel (top priority)

 <p>The screenshot shows a Joomla! site tools panel. It features a dark grey L-shaped header with a gear icon in the top right corner. Below the header is a horizontal row of six colored circles: light blue, red, green, purple, dark grey, and yellow.</p>	<p>Template color can be selected by <b>Color Selector</b> from <b>Site tools</b>.</p> <p>This setting is considered as the visitor's preference and has top priority. It will overwrite both Page Class and default settings of parameter Template Color.</p>
--	--

## Video tutorial

It guides you how to configure colors visually. Here are [video tutorials](#).

**JSN Epic** in the video is an example and these instructions can be applied to **JSN templates** as well.

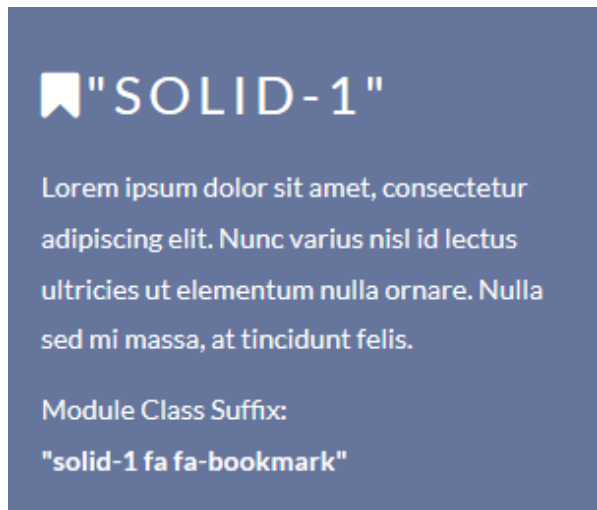

## Module Styles

JSN Ferado provides **six box designs** for module background styling, which can be combined with **UniIcons** for module title styling.

Module styles are configured by module's parameter **Module Class Suffix**. All available values are described below and need to be applied **without double quotes**.

### Module Box Designs

Box designs to be applied to modules.

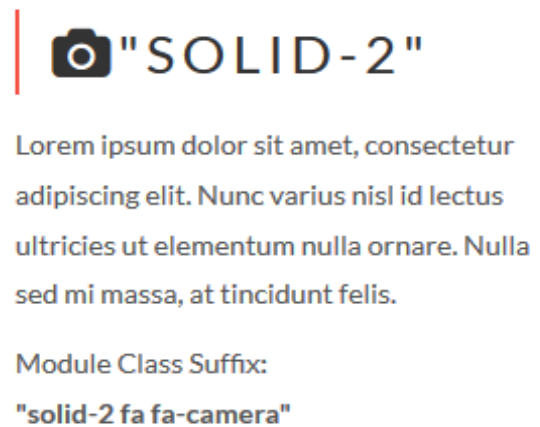

"SOLID-1"

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nunc varius nisl id lectus ultricies ut elementum nulla ornare. Nulla sed mi massa, at tincidunt felis.

Module Class Suffix:  
"solid-1 fa fa-bookmark"

“solid-1”

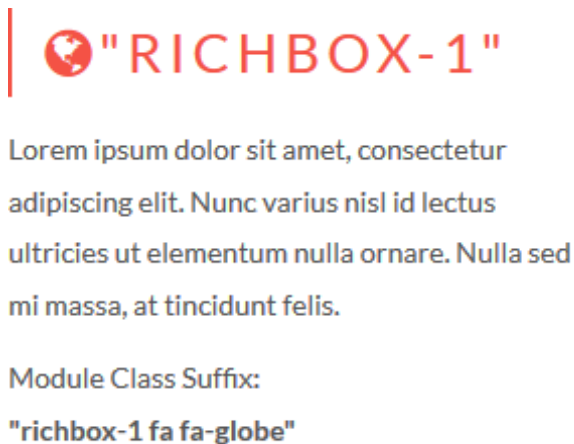

"SOLID-2"

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nunc varius nisl id lectus ultricies ut elementum nulla ornare. Nulla sed mi massa, at tincidunt felis.

Module Class Suffix:  
"solid-2 fa fa-camera"

“solid -2”

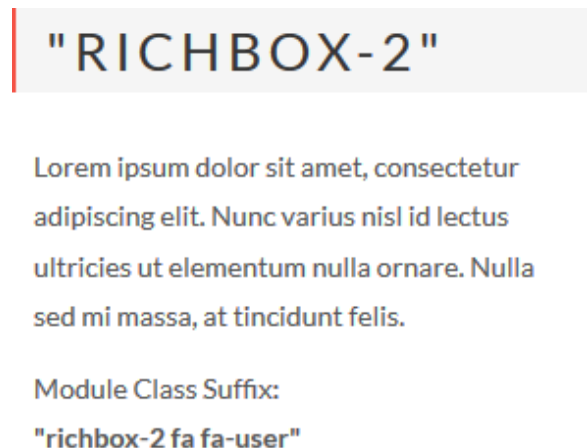

"RICHBOX-1"

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nunc varius nisl id lectus ultricies ut elementum nulla ornare. Nulla sed mi massa, at tincidunt felis.

Module Class Suffix:  
"richbox-1 fa fa-globe"

“richbox-1”

"RICHBOX-2"

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nunc varius nisl id lectus ultricies ut elementum nulla ornare. Nulla sed mi massa, at tincidunt felis.

Module Class Suffix:  
"richbox-2 fa fa-user"

“richbox-2”

Box designs available in PRO edition only **PRO**

 "LIGHTBOX-1"

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nunc varius nisl id lectus ultricies ut elementum nulla ornare. Nulla sed mi massa, at tincidunt felis.

Module Class Suffix:

"lightbox-1 fa fa-search"

“**lightbox-1**”

 "LIGHTBOX-2"

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nunc varius nisl id lectus ultricies ut elementum nulla ornare. Nulla sed mi massa, at tincidunt felis.

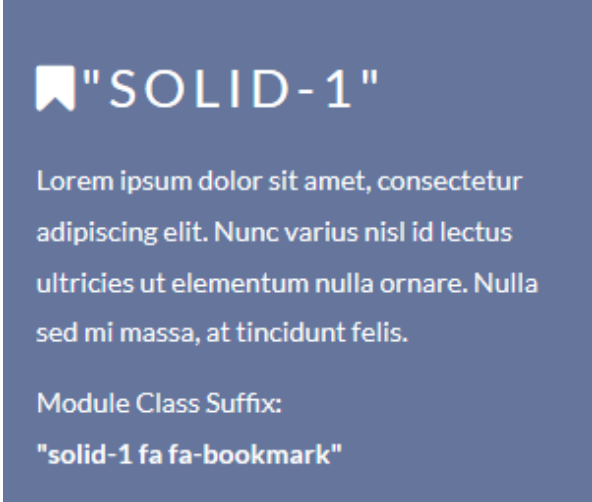

Module Class Suffix:

"lightbox-2 fa fa-calendar"

“**lightbox -2**”

## Module Icon Designs **PRO**

You can attach any of the **UniIcons** to the module's title. To set up icons, you need to add the string **jsn-icon-xxx** to the module class suffix, where **xxx** is the icon name.

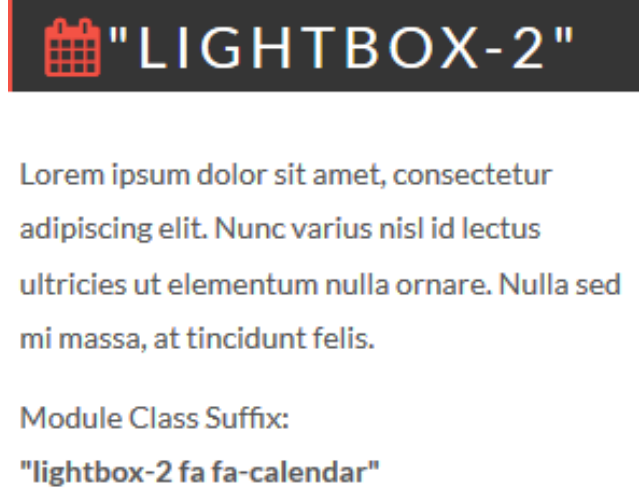

**"SOLID-1"**

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nunc varius nisl id lectus ultricies ut elementum nulla ornare. Nulla sed mi massa, at tincidunt felis.

Module Class Suffix:  
"solid-1 fa fa-bookmark"

**"solid-1 fa fa-bookmark"**

**"LIGHTBOX-2"**

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nunc varius nisl id lectus ultricies ut elementum nulla ornare. Nulla sed mi massa, at tincidunt felis.

Module Class Suffix:  
"lightbox-2 fa fa-calendar"

**"lightbox-2 fa fa-calendar"**

## Typography

JSN Ferado was created with a **strong focus on typography** and we believe it contains the most comprehensive content presentation capability. Headings, text, links, tables, images, everything was designed with high level of refinement. Let's take a look.

### Content columns **PRO**

It's a pretty common situation when you need to arrange your content in multiple columns. JSN Ferado offers you very a convenient and accessible method to create **multiple column content**. This is a real step forward removing table tags from your content and leaving them only for showing tabular data.

You can arrange your content in **as many columns as you like**. JSN Ferado will detect the number of columns you have and automatically arrange them. The only thing you need to do is to set class **grid-layout** to parent DIV tag.

Below are screenshots of how this feature looks and example how to use it.

### Content arranged in 2 columns

Content arranged in 2 columns

Text column

Lorem ipsum dolor sit amet consectetur eleifend elit vel tellus laoreet. At ut pellentesque risus quis sem eros et consequat enim lorem. Aenean lorem consequat consequat eu.

Text column

Lorem ipsum dolor sit amet consectetur eleifend elit vel tellus laoreet. At ut pellentesque risus quis sem eros et consequat enim lorem. Aenean lorem consequat consequat eu.

### Usage:

```
<div class="grid-layout">
```

```
  <div>Text in column 1</div>
```

```
  <div>Text in column 2</div>
```

```
</div>
```

## Content arranged in 3 columns

Content arranged in 3 columns

Text column

Lorem ipsum dolor sit amet consectetur eleifend elit vel tellus laoreet. At ut pellentesque risus quis sem eros et consequat enim lorem. Aenean lorem consequat consequat eu.

Text column

Lorem ipsum dolor sit amet consectetur eleifend elit vel tellus laoreet. At ut pellentesque risus quis sem eros et consequat enim lorem. Aenean lorem consequat consequat eu.

Text column

Lorem ipsum dolor sit amet consectetur eleifend elit vel tellus laoreet. At ut pellentesque risus quis sem eros et consequat enim lorem. Aenean lorem consequat consequat eu.

### Usage:

```
<div class="grid-layout">
```

```
  <div>Text in column 1</div>
```

```
  <div>Text in column 2</div>
```

```
  <div>Text in column 3</div>
```

```
</div>
```

## Heading styles

### Headings

## This is an H1 Header

Lorem ipsum dolor sit amet consectetur eleifend elit vel tellus laoreet. At ut pellentesque risus quis sem eros et consequat enim lorem. Aenean lorem consequat consequat eu.

## This is an H2 Header

Lorem ipsum dolor sit amet consectetur eleifend elit vel tellus laoreet. At ut pellentesque risus quis sem eros et consequat enim lorem. Aenean lorem consequat consequat eu.

### This is an H3 Header

Lorem ipsum dolor sit amet consectetur eleifend elit vel tellus laoreet. At ut pellentesque risus quis sem eros et consequat enim lorem. Aenean lorem consequat consequat eu.

### This is an H4 Header

Lorem ipsum dolor sit amet consectetur eleifend elit vel tellus laoreet. At ut pellentesque risus quis sem eros et consequat enim lorem. Aenean lorem consequat consequat eu.

### This is an H5 Header

Lorem ipsum dolor sit amet consectetur eleifend elit vel tellus laoreet. At ut pellentesque risus quis sem eros et consequat enim lorem. Aenean lorem consequat consequat eu.

### This is an H6 Header

Lorem ipsum dolor sit amet consectetur eleifend elit vel tellus laoreet. At ut pellentesque risus quis sem eros et consequat enim lorem. Aenean lorem consequat consequat eu.

As we all know, headings are “title” of undergoing text blocks, so it must have a distinguish look. JSN Ferado provides styling for five main headings. To apply them you just need to wrap your heading text in regular heading tags like `<h1>...</h1>`, `<h2>...</h2>`, `<h3>...</h3>`, etc.

## Text styles

JSN Ferado provides **12 text styles** for making your content easier to scan and read. Below are screenshots of text styles and usage examples.

### Preformatted text

You can use this style to present text with preserved spaces like text block of CSS code or other programming language.

```
div.grid-layout2 div.grid-col {
float: left;
width: 49.95%;
}
div.grid-layout3 div.grid-col {
float: left;
width: 33.3%;
}
```

#### Usage:

`<pre>`Your preformatted text`</pre>`

### Quote text

You can use this style to quote somebody's speech, idea or a fragment from books, articles, etc.

#### Quote text (<blockquote> tag)

*You can use this style to quote somebody's speech, idea or a fragment from some book, articles, etc. Lorem ipsum dolor sit amet consectetur eleifend elit vel tellus laoreet. At ut pellentesque risus quis sem eros et consequat enim lorem. Aenean lorem consequat consequat eu.*

**Usage:** `<blockquote>`This is your quote`</blockquote>`

#### Usage:

`<blockquote>`Your quote text`</blockquote>`

## Drop cap symbol

You can use this special drop cap symbol style for magazine / newspaper text paragraph.

### Drop Cap

**Y**ou can use this special drop cap symbol style for magazine / newspaper text paragraph. Lorem ipsum dolor sit amet consectetur eleifend elit vel tellus laoreet. At ut pellentesque risus quis sem eros et consequat enim lorem. Aenean lorem consequat consequat eu.

**Usage:** `<p class="text-dropcap">This is the text with dropcap symbol.</p>`

### Usage:

`<div class="text-dropcap"><p>Your magazine text paragraph.</p></div>`

## Highlighted text

You can use this style to highlight important words and / or keyword expression in search result page.

### Highlighted Text

You can use this style to highlight important words and / or keyword expression in search result page. Lorem ipsum dolor sit amet consectetur eleifend elit vel tellus laoreet. At ut pellentesque risus quis sem eros et consequat enim lorem. Aenean lorem consequat consequat eu.

**Usage:** `<span class="text-highlight">This is the text to be highlighted.</span>`

### Usage:

`<span class="text-highlight">Text to be highlighted.</span>`

## Highlighted text on mouse over

You can use this style to highlight important box of words or expression on mouse over.

### Highlighted Text on mouse over

You can use this style to highlight important text block on mouse over. Just roll mouse over this text block to see how it's highlighted.

**Usage:** `<div class="text-box-highlight">This is the text to be highlighted.</div>`

You can use this style to highlight important text block on mouse over. Just roll mouse over this text block to see how it's highlighted.

**Usage:** `<div class="text-box-highlight">This is the text to be highlighted.</div>`

### Usage:

`<div class="text-box-highlight">Text to be highlighted.</div>`

## Alert text **PRO**

You can use this style for alert or warning text paragraphs which require user's attention.

### Alert Text

You can use this style for alert or warning text paragraph requiring user's attention. At ut pellentesque risus quis sem eros et consequat enim lorem. Aenean lorem consequat consequat eu.

**Usage:** `<p class="text-alert">This is text that requires user's attentions.</p>`

### Usage:

`<p class="text-alert">Your alert text that requires user's attentions.</p>`

`<div class="text-alert">Your alert text that requires user's attentions.</div>`

## Info text **PRO**

You can use this style for regular information text paragraphs that do not require much user's attention.

### Info Text

You can use this style for regular information text paragraph that does not require much user's attentions. At ut pellentesque risus quis sem eros et consequat enim lorem. Aenean lorem consequat consequat eu.

**Usage:** `<p class="text-info">This is your d text.</p>`

### Usage:

`<p class="text-info">Your information text.</p>`

`<div class="text-info">Your information text.</div>`

## Download text **PRO**

You can use this style for information text paragraph related to the download process.

### Download Text

You can use this style for information text paragraph related to download process. At ut pellentesque risus quis sem eros et consequat enim lorem. Aenean lorem consequat consequat eu.

**Usage:** `<p class="text-download">This is download related text.</p>`

### Usage:

`<p class="text-download">Your download text.</p>`

`<div class="text-download">Your download text.</div>`

## Tip text **PRO**

You can use this style for useful information like tips, hints or help text.

### Tip Text

You can use this style for useful information like tips, hint or help text. At ut pellentesque risus quis sem eros et consequat enim lorem. Aenean lorem consequat consequat eu.

**Usage:** `<p class="text-tip">This is your tip hint or help text.</p>`

### Usage:

`<p class="text-tip">Your tip, hint or help text.</p>`

`<div class="text-tip">Your tip, hint or help text.</div>`

## Comment text **PRO**

You can use this style for comment text paragraphs.

### Comment Text

You can use this style for comment text paragraph. At ut pellentesque risus quis sem eros et consequat enim lorem. Aenean lorem consequat consequat eu.

**Usage:** `<p class="text-comment">This is your comment text.</p>`

### Usage:

`<p class="text-comment">Your comment text.</p>`

`<div class="text-comment">Your comment text.</div>`

## Attachment text **PRO**

You can use this style for information text paragraphs related to attachment file.

### Attachment Text

You can use this style for information text paragraph related to attachment file. At ut pellentesque risus quis sem eros et consequat enim lorem. Aenean lorem consequat consequat eu.

**Usage:** `<p class="text-attachment">This is your attachment related text.</p>`

### Usage:

`<p class="text-attachment">Your attachment text.</p>`

## Video text **PRO**

You can use this style for description text paragraphs that related to video file.

### Video Text

You can use this style for description text paragraph that related to video file. At ut pellentesque risus quis sem eros et consequat enim lorem. Aenean lorem consequat consequat eu.

**Usage:** `<p class="text-video">This is your video related text.</p>`

### Usage:

`<p class="text-video">Your video text.</p>`

`<div class="text-video">Your video text.</div>`.

## Audio text **PRO**

You can use this style for description text paragraph related to audio file.

### Audio Text

You can use this style for description text paragraph related to audio file. At ut pellentesque risus quis sem eros et consequat enim lorem. Aenean lorem consequat consequat eu.

**Usage:** `<p class="text-audio">This is your audio related text.</p>`

### Usage:

`<p class="text-audio">Your attachment text.</p>`

`<div class="text-audio">Your attachment text.</div>`.

## Link styles **PRO**

### Icon link styles

You can attach any of **500+ predefined icons** to the front of any link by adding simple class to it.

 Link with article icon

 Link with help icon

 Link with selection icon

 Link with calendar icon

 Link with home icon

 Link with star icon

 Link with cart icon

 Link with image icon

 Link with settings icon

 Link with comment icon

 Link with info icon

 Link with statistics icon

 Link with display icon

 Link with mail icon

 Link with user icon

 Link with download icon

 Link with rss icon

 Link with like icon

 Link with folder icon

 Link with search icon

 Link with trash icon

#### Usage:

`<a class="link-icon fa fa-xxx">This is link text.</a>`, where **xxx** is the name of icon to be applied.

#### Example:

`<a class="link-icon fa fa-download">This is link to download something.</a>`, where **url** is the website hyperlink.

#### Example:

`<a class="link-action" href="http://www.joomlashine.com">Joomlashine.</a>`

## Button link styles

JSN Ferado offers **8 button styles** to Ferado any call-to-action links you have in the content.

### Link Button Styles

JSN Ferado offers **08 button styles** to decorate any call-to-action links you have in the content.

#### Usage:

```
<a class="link-button button-xxx">This is link text.</a>
```

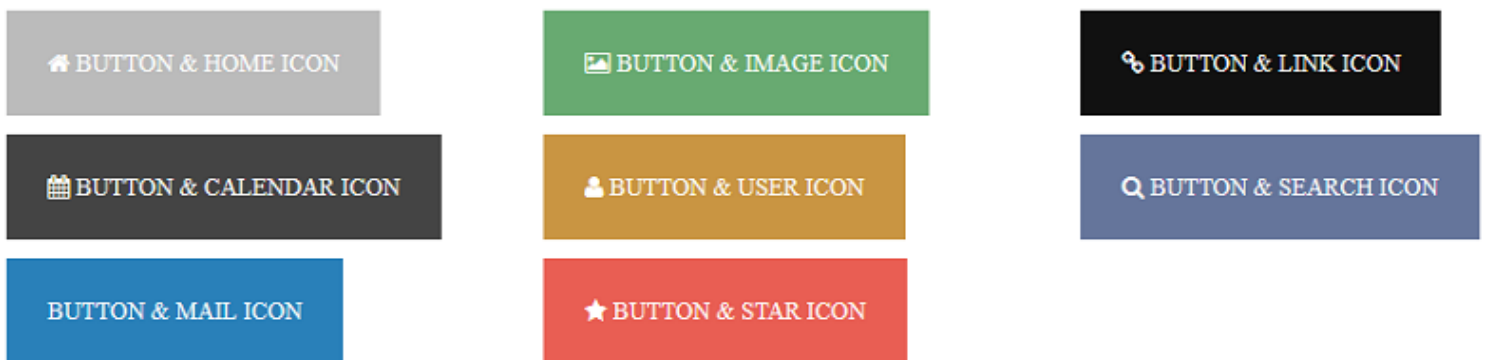

where **xxx** is the button color name selected from: **light, dark, blue, yellow, red, green, brown** and **purple**.

#### Example:

```
<a class="link-button button-red">See plans & pricing.</a>
```

## Button and Icon link styles combined

You can use both button and icon link style combined.

#### Usage:

```
<a class="link-button button-xxx"><span class="link-icon fa fa-yyy">This is link text.</span></a>
```

where **xxx** and **yyy** are button color and icon names respectively.

#### Example:

`<span class="link-button button-green"><a class="link-icon jsn-icon-cart">Add to cart.</a></span>`

## Extension link styles

JSN Ferado is able to attach not only descriptive icon to the front of link as described in the above section, but also **23 extension icons** to the end of the link.

### Extension link styles

JSN Ferado is able to attach not only descriptive icon to the front of link as described in above section, but also **23 extension icons** to the end of the link.

- AIM contact link (aim:)
- Application file (.app)
- Archive file (.zip, .rar, .gzip)
- Calendar file (.ical)
- Cascading Style Sheet file (.css)
- Microsoft Word file (.doc)
- Microsoft Excel file (.xls)
- Feed item (.rss, .atom)
- Adobe Flash / Flex file (.fla, .swf)
- Font file (.ttf)
- Email link (mailto:)
- Call link (callto:)
- Movie file (.mp4, .avi, .mpg)
- MSN IM contact link (msnim:)
- Music file (.mp3, .wav, .wma)
- Adobe PDF file (.pdf)
- Microsoft PowerPoint file (.pps)
- QuickTime movie file (.mov)
- Skype contact link (skype:)
- Regular text file (.txt)
- Torrent metainfo file (.torrent)
- Electronic business card (.vcard)
- Yahoo Messenger contact (ymsgr:)

There are 2 ways of utilization extension icons.

## Automatic assignment

JSN Ferado is able to detect links to various popular file extensions and assign icons accordingly. This feature utilizes the modern CSS2 specification allowing you to have links with meaningful icons assigned without any modification in XHTML code. Moreover, it can detect the protocol type to assign icons to links to instant messengers, email, etc.

## Manual assignment

As stated before, most browsers icons will be automatically assigned thanks to the modern CSS2 specification. Unfortunately IE6 does not support this specification and you have manually set an appropriate class for links. Also, this can help if, for some reason, you turned off the auto icon link template parameter but still want to manually apply icons to links.

**Usage:** `<a class="link-icon-ext jsn-icon-ext-xxx">This is link text.</a>`, where **xxx** is the icon name described below.

*See other FREE Hi-Quality Joomla Templates: <http://www.joomlashine.com/free-joomla-templates.html>*

JSN Ferado utilizes the CSS sprite technique to reduce the number of HTTP requests to server in order to get icons. Technically, all icons are merged in Ferado single image file and visitors will need to make **Ferado single request/download** to get that file with all icons. If you have extra time, please read [more about CSS sprites](#).

## Table styles **PRO**

Tabular data is a very common type of information to be presented on the web. By default, tables look ugly and not much readable. With JSN Ferado you have **3 table styles** to present virtually any kind of tabular data you have.

### Plain Row table style

Plain Rows table style

Table header	Column header 1	Column header 2	Column header 3
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Table footer	Footer data		

#### Usage:

```
<table class="table-style style-colorheader">...</table>
```

### Color Stripes table style

Color Stripes table style

Table header	Column header 1	Column header 2	Column header 3
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Table footer	Footer data		

#### Usage:

```
<table class="table-style style-colorstripes">...</table>
```

## Grey Stripes table style

Grey Stripes table style

Table header	Column header 1	Column header 2	Column header 3
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Table footer		Footer data	

### Usage:

`<table class="table-style style-greystripes">...</table>`

### Attention!

In order to get table styles shown correctly, you need to create Ferado XHTML code as show bellow.

```
<table width="100%" class="table-style style-colorheader">
  <thead>
    <tr>
      <th>Table header</th>
      <th>Column header 1</th>
      <th class="highlight">Column header 2</th>
      <th>Column header 3</th>
    </tr>
  </thead>
  <tfoot>
    <tr>
      <th>Table footer</th>
      <td colspan="3">Footer data</td>
    </tr>
  </tfoot>
  <tbody>
    <tr class="odd">
      <th>Row header 1</th>
      <td>Lorem ipsum</td>
      <td class="highlight">Dolor sit amet</td>
      <td>Lorem ipsum</td>
    </tr>
  </tbody>
</table>
```

## List styles

List is the crucial element in every content, not only online websites. List can really help readers to scan the content and catch important pieces by just a glance.

### Standard list styles

#### Unordered list

##### Unordered list

- Lorem ipsum dolor sit amet
- Consetetur sadipscing elitr
- Sed diam voluptua

Usage: `<ul><li>...</li></ul>`

#### Ordered list

##### Ordered list

1. Lorem ipsum dolor sit amet
2. Consetetur sadipscing elitr
3. Sed diam voluptua

Usage: `<ol><li>...</li></ol>`

### Arrow list styles

#### Red arrow

##### Red arrow

- ▶ Lorem ipsum dolor sit amet
- ▶ Consetetur sadipscing elitr
- ▶ Sed diam voluptua

Usage:

`<ul class="list-arrow arrow-red"><li>...</li></ul>`

#### Blue arrow

##### Blue arrow

- ▶ Lorem ipsum dolor sit amet
- ▶ Consetetur sadipscing elitr
- ▶ Sed diam voluptua

Usage:

`<ul class="list-arrow arrow-blue"><li>...</li></ul>`

#### Green arrow

##### Green arrow

- ▶ Lorem ipsum dolor sit amet
- ▶ Consetetur sadipscing elitr
- ▶ Sed diam voluptua

Usage:

`<ul class="list-arrow arrow-green"><li>...</li></ul>`

## Number list style **PRO**

### Blue Bullet number list

#### Blue Bullet number list

- 1 Lorem ipsum dolor sit amet
- 2 Consetetur sadipscing elitr
- 3 Sed diam voluptua

#### Usage:

```
<ul class="list-number-bullet bullet-blue"><li>...
```

### Green Bullet number list

#### Green Bullet number list

- 1 Lorem ipsum dolor sit amet
- 2 Consetetur sadipscing elitr
- 3 Sed diam voluptua

#### Usage:

```
<ul class="list-number-bullet bullet-green"><li>...
```

### Purple Bullet number list

#### Purple Bullet number list

- 1 Lorem ipsum dolor sit amet
- 2 Consetetur sadipscing elitr
- 3 Sed diam voluptua

#### Usage:

```
<ul class="list-number-bullet bullet-purple"><li>...
```

### Yellow Bullet number list

#### Yellow Bullet number list

- 1 Lorem ipsum dolor sit amet
- 2 Consetetur sadipscing elitr
- 3 Sed diam voluptua

#### Usage:

```
<ul class="list-number-bullet bullet-yellow"><li>...
```

### Red Bullet number list

#### Red Bullet number list

- 1 Lorem ipsum dolor sit amet
- 2 Consetetur sadipscing elitr
- 3 Sed diam voluptua

#### Usage:

```
<ul class="list-number-bullet bullet-red"><li>...
```

### Brown Bullet number list

#### Brown Bullet number list

- 1 Lorem ipsum dolor sit amet
- 2 Consetetur sadipscing elitr
- 3 Sed diam voluptua

#### Usage:

```
<ul class="list-number-bullet bullet-brown"><li>...
```

### Blue Digit number list

Blue Digit number list

- 1 Lorem ipsum dolor sit amet
- 2 Consetetur sadipscing elitr
- 3 Sed diam voluptua

#### Usage:

`<ul class="list-number-digit digit-blue"><li>...`

### Green Digit number list

Green Digit number list

- 1 Lorem ipsum dolor sit amet
- 2 Consetetur sadipscing elitr
- 3 Sed diam voluptua

#### Usage:

`<ul class="list-number-digit digit-green"><li>...`

### Purple Digit number list

Purple Digit number list

- 1 Lorem ipsum dolor sit amet
- 2 Consetetur sadipscing elitr
- 3 Sed diam voluptua

#### Usage:

`<ul class="list-number-digit digit-purple"><li>...`

### Yellow Digit number list

Yellow Digit number list

- 1 Lorem ipsum dolor sit amet
- 2 Consetetur sadipscing elitr
- 3 Sed diam voluptua

#### Usage:

`<ul class="list-number-digit digit-yellow"><li>...`

### Red Digit number list

Red Digit number list

- 1 Lorem ipsum dolor sit amet
- 2 Consetetur sadipscing elitr
- 3 Sed diam voluptua

#### Usage:

`<ul class="list-number-digit digit-red"><li>...`

### Brown Digit number list

Brown Digit number list

- 1 Lorem ipsum dolor sit amet
- 2 Consetetur sadipscing elitr
- 3 Sed diam voluptua

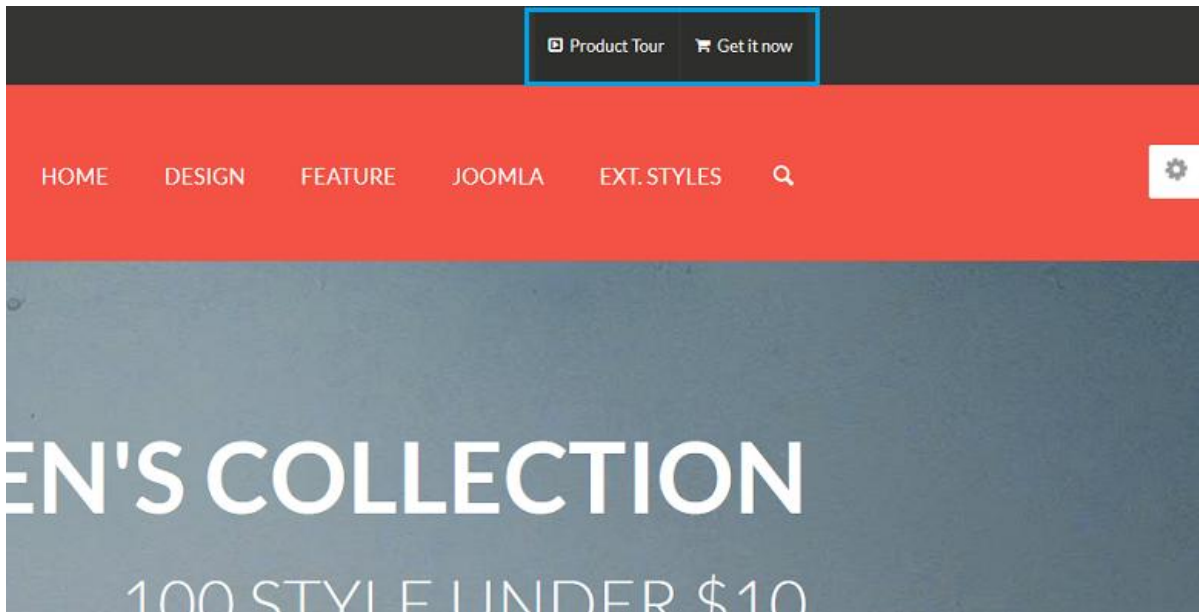

#### Usage:

`<ul class="list-number-digit digit-brown"><li>...`

## Menu Styles

JSN Ferado provides **five menu styles** to present your website navigation. The default Joomla! built-in menu module (**mod\_mainmenu**) is utilized, so you don't need to install any external menu modules.

### Top Menu

Top Menu allows you to arrange menu items in horizontal lines and assign icons to them. All icons are configured directly in the menu item settings page which is very convenient.

To set up Top Menu please select the menu module you want to use and set up parameters as follows:

1. Title: **Top Menu** (or any other you like)
2. Show title: **Hide**
3. Position: **topbar**
4. Access: **public**
5. Language: **All**
6. Select Menu: **Top Menu** (you might want to use another sources here)
7. Start Level: **1**
8. End Level: **2**
9. Show sub-menu items: **No**

10. Menu Class Suffix: **menu-topmenu menu-iconmenu** (Please only use “menu-iconmenu” if you want to display icons)

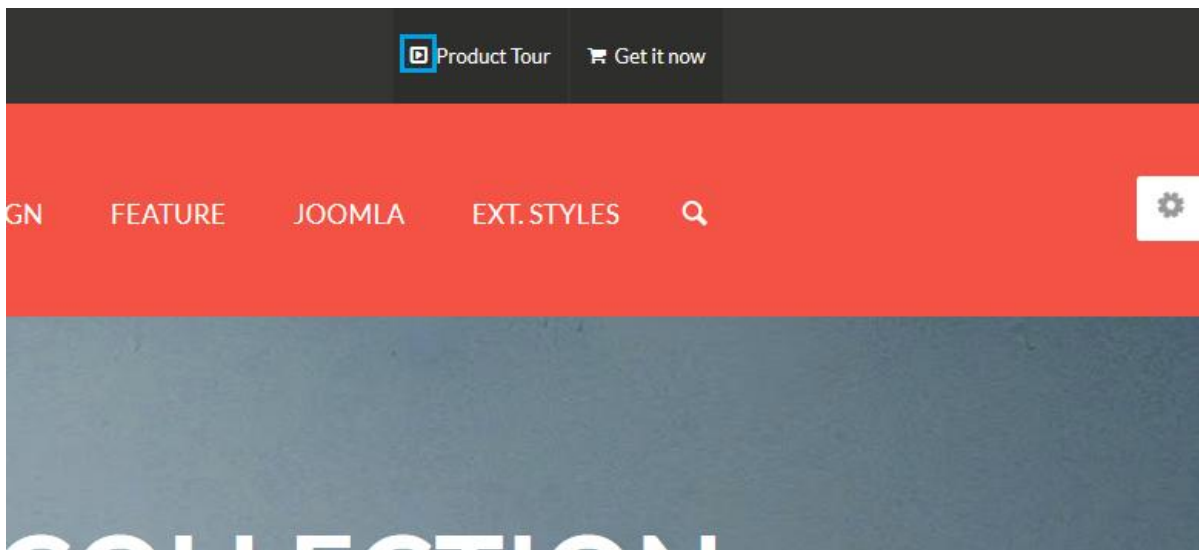

### Attention!

There is a common misconception about **Menu Class Suffix** and **Module Class Suffix**. They are absolutely different parameters, so please pay attention to their settings.

### Top Menu icons

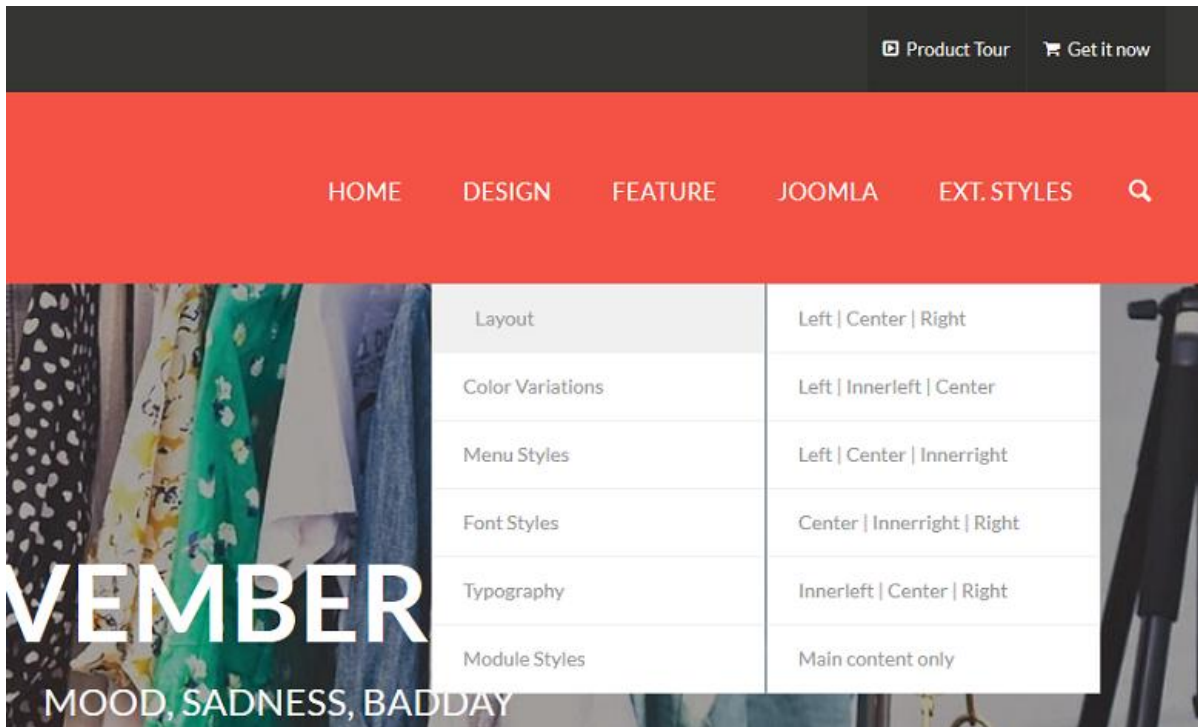

You can attach any of the **UniIcons** to top menu items to make them more appealing. To set up icons, you need to go to menu item settings and take the following steps:

Add symbol combination **fa fa-xxx** to menu item’s parameter **Link CSS Style**, where **xxx** is the icon name.

## Main Menu

Main Menu is a powerful menu built with clean accessible XHTML code structure and effective drop-down submenu panels.

To set up Main Menu please select the menu you want to use and set up parameters as follows:

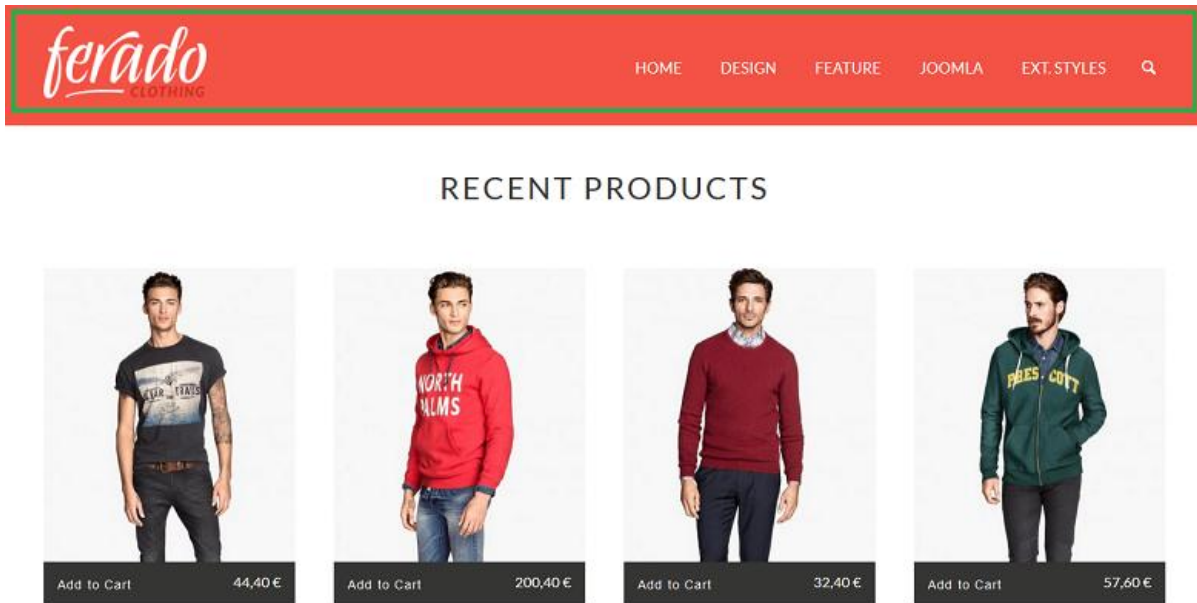

1. Title: **Main Menu** (or any other you like)
2. Show title: **Hide**
3. Position: **mainmenu**
4. Access: **public**
5. Language: **All**
6. Select Menu: **Main Menu** (you might want to use another menu source here)
7. Start Level: **1**
8. End Level: **All**
9. Show Sub-menu Items: **Yes**
10. Menu Class Suffix: **menu-mainmenu menu-iconmenu menu-richmenu** (Please only use “menu-iconmenu” if you want to display icons and use “menu-richmenu” if you want to display rich text)

### Attention!

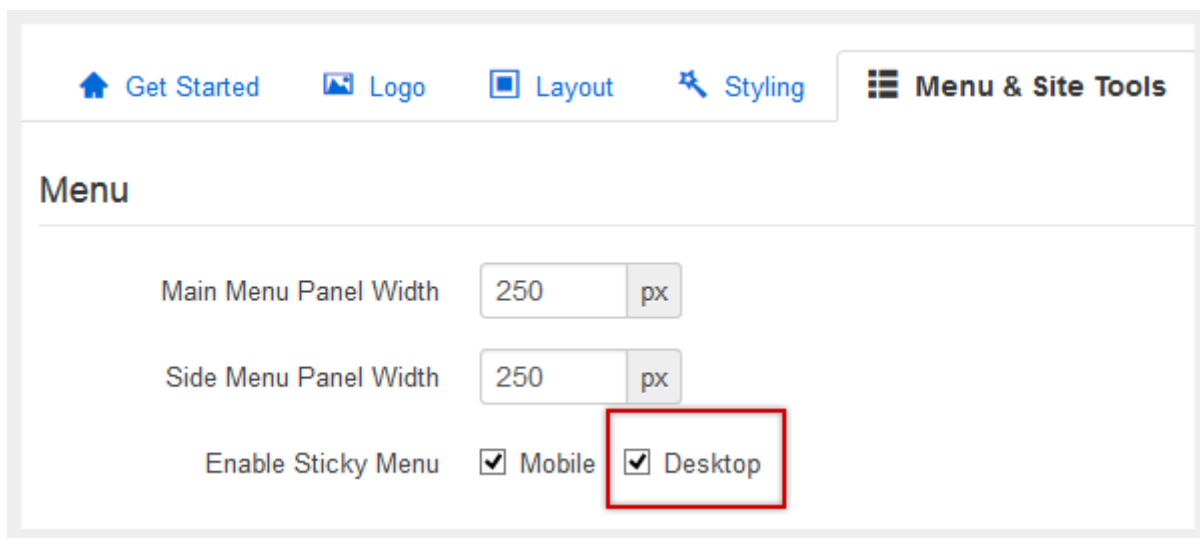

There is a common misconception about **Menu Class Suffix** and **Module Class Suffix**. They are absolutely different parameters, so please pay attention to their settings.

## Sticky Desktop Menu

With **Sticky Desktop Menu**, the main menu will always appear at the top – even when you scroll the web page down. To enable this feature, you tick the box **Desktop** in the parameter **Enable Sticky Menu**.

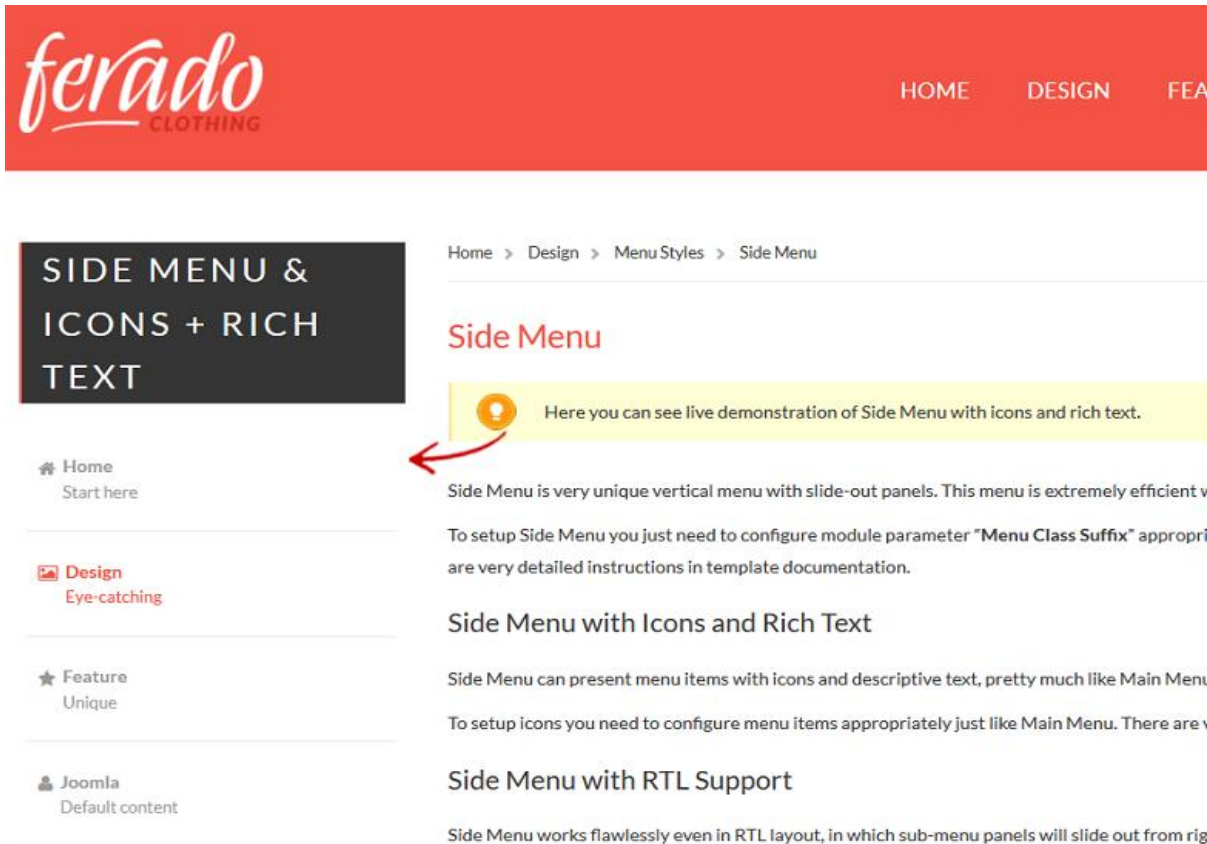

*The Sticky Desktop Menu*

*The Sticky Desktop Menu setting*

## Side Menu **PRO**

**Side Menu** is a unique vertical menu with slide-out panels. This menu is extremely efficient when you have complex navigation with a lot of menu items.

To set up Side Menu please select the menu module you want to use and set up parameters as following:

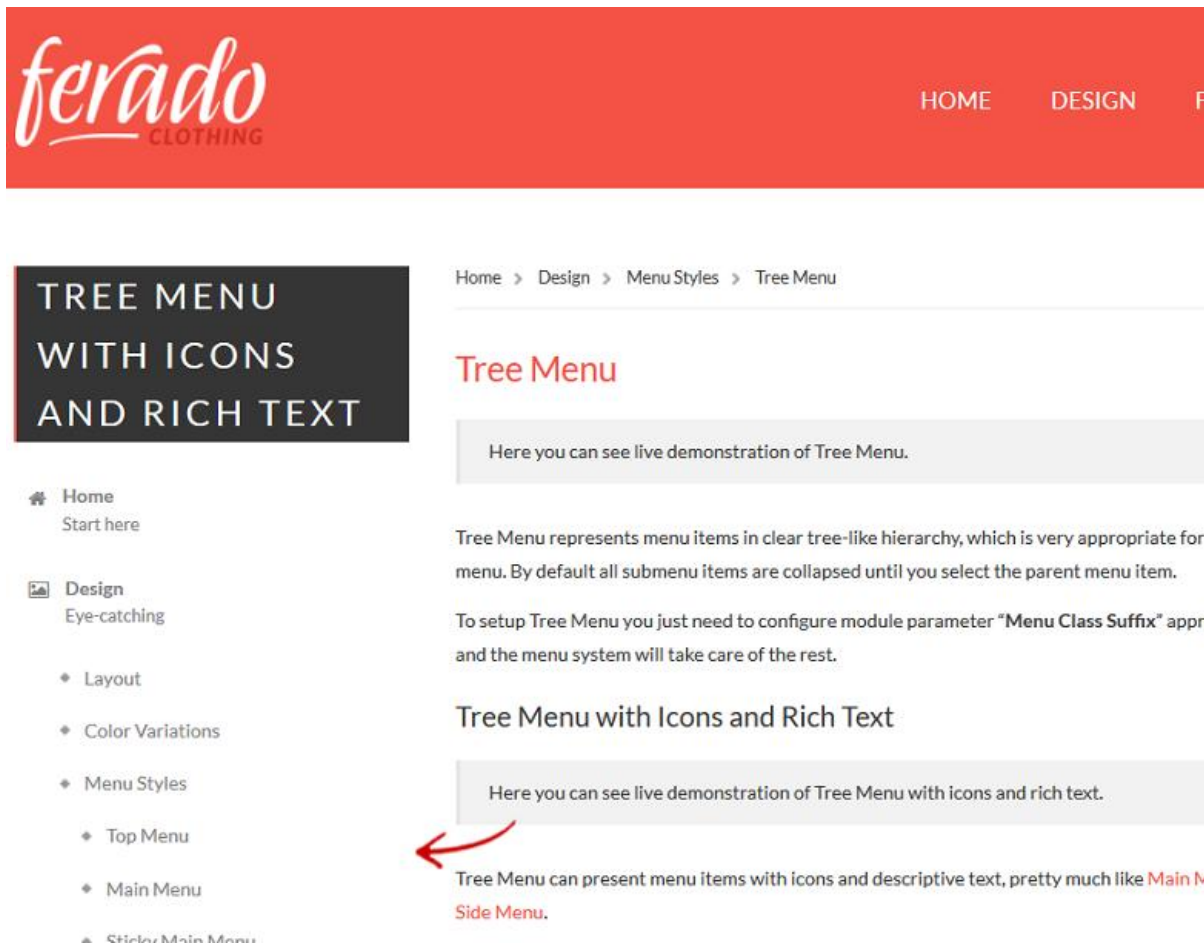

1. Title: **Side Menu** (or any other you like)
2. Show Title: **Show**
3. Position: **left**
4. Access: **Public**
5. Language: **All**
6. Select Menu: **Main Menu** (you might want to use another menu source here)
7. Start Level: **1**
8. End Level: **All**
9. Show sub-menu items: **Yes**

10. Menu Class Suffix: **menu-sidemenu menu-iconmenu menu-richmenu** (Please only use “menu-iconmenu” if you want to display icons and use “menu-richmenu” if you want to display rich text)

## Attention!

There is a common misconception about **Menu Class Suffix** and **Module Class Suffix**. They are absolutely different parameters, so please pay attention to their settings.

## Tree Menu

Tree Menu represents menu items in a clear tree-like hierarchy which is very appropriate for indexing menu. By default all sub-menu items are collapsed until you select the parent menu item.

To set up Tree Menu please select the menu module you want to use and set up parameters as following:

1. Title: **Tree Menu** (or any other you like)
2. Show Title: **Show**
3. Position: **right**

4. Access: **Public**
5. Language: **All**
6. Select Menu: **Main Menu** (you might want to use another menu source here)
7. Start Level: **1**
8. End Level: **All**
9. Show sub-menu items: **No**
10. Menu Class Suffix: **menu-treemenu menu-iconmenu menu-richmenu** (Please only use “menu-iconmenu” if you want to display icons and use “menu-richmenu” if you want to display rich text)

### Tree Menu Icons and Rich Text

You can set up menu items to utilize both icons and rich text just as you can with Main Menu.

#### **Video tutorial**

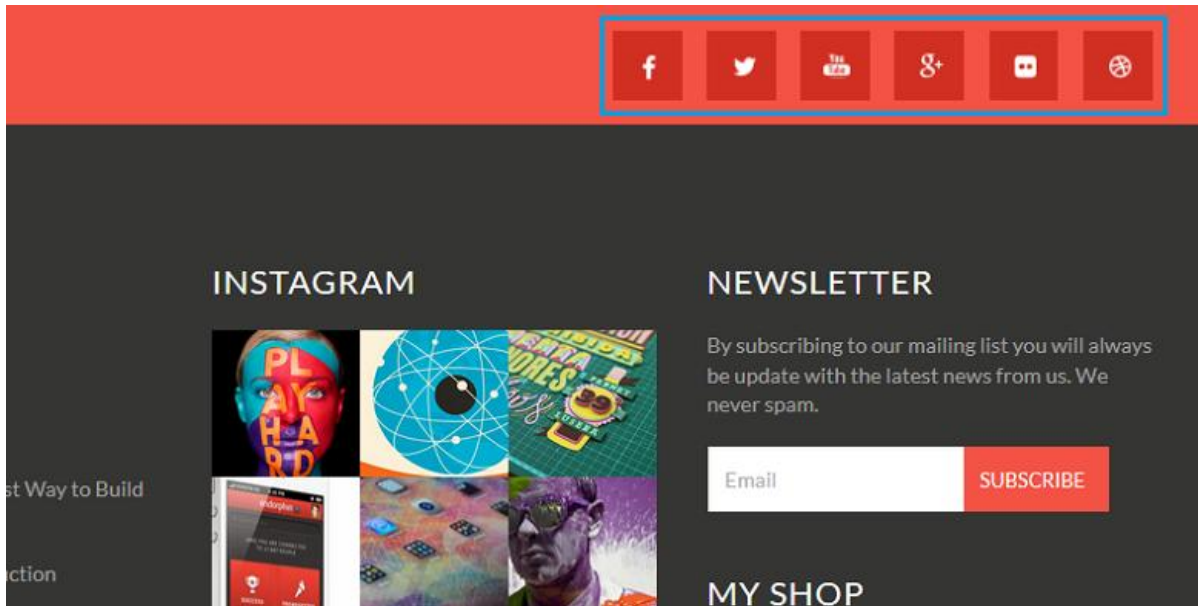

It guides you how to configure menus visually. Here are [video tutorials](#).

**JSN Epic** in the video is an example and these instructions can be applied to all **JSN templates** as well.

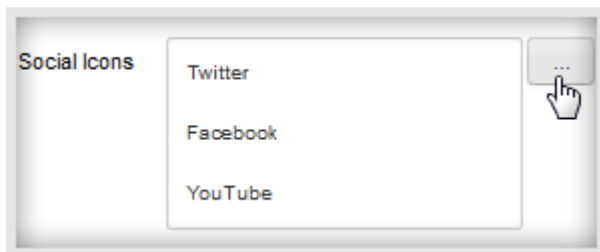

## Social Icons

PRO

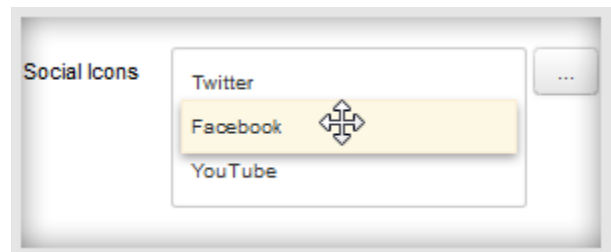

Social icons in JSN Ferado

In JSN Ferado, you are free to integrate your social channels without digging into the code. Just configure the social icons with their URLs with the parameter **“Social icons”** in the section **“SEO & System”** in the back-end. You can also change positions of social icons by dragging and dropping them.

Change social channels

Change positions of social channels

There are there default social channels: Facebook, Twitter and YouTube. You can integrate more 9 social channels: Google+, Pinterest, MySpace, Flickr, Dribbble, StumbleUpon, Yahoo, Skype and RSS. Just click the button on the right and add new URLs to the pop-up “Social Network Integration”, the corresponding social integrations will be shown up.

### Social Network Integration

Facebook	<input type="text" value="http://www.facebook.com/joomlashine"/>
Twitter	<input type="text" value="http://www.twitter.com/joomlashine"/>
Google+	<input type="text" value="http://plus.google.com/your_user_id"/>
YouTube	<input type="text" value="http://www.youtube.com/joomlashine"/>
Pinterest	<input type="text" value="http://www.pinterest.com/your_user_name"/>
MySpace	<input type="text" value="http://www.myspace.com/your_user_name"/>
Flickr	<input type="text" value="http://www.flickr.com/people/your_user_name"/>
Dribble	<input type="text" value="http://www.dribble.com/your_user_name"/>
StumbleUpon	<input type="text" value="http://your_user_name.stumbleupon.com"/>
Yahoo	<input type="text" value="ymsgr:sendim?your_user_name"/>
Skype	<input type="text" value="skype:your_user_name?call"/>

*The pop-up of Social Network Integration*

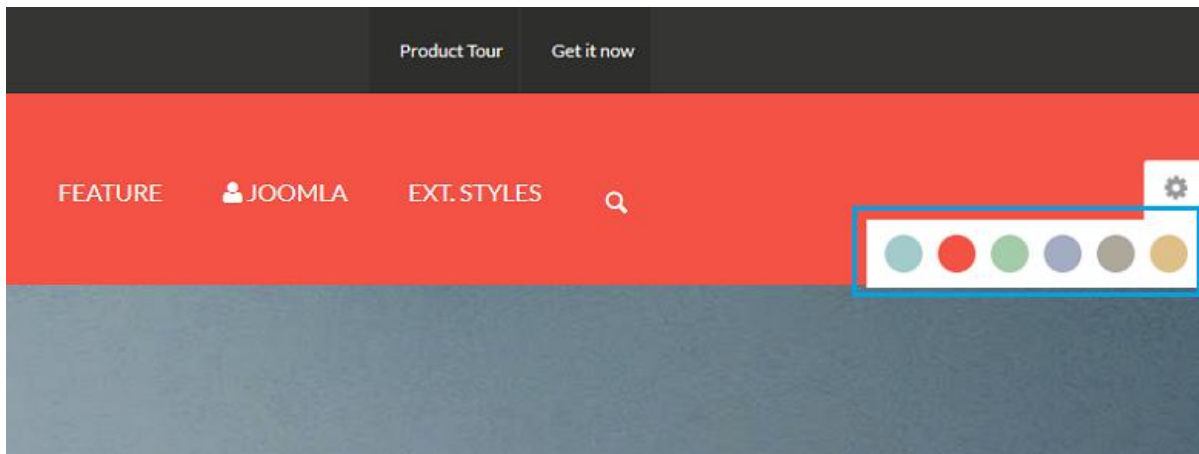

## Site Tools **PRO**

JSN Ferado provides a cool feature to enhance website user experience: **Color Selector**. By enabling this selector, you will certainly be giving visitors the best user experience on your website. All settings from Site tools will be stored as visitor's browser cookies for further usage. If this selector is disabled, nothing from Site Tools will be shown.

### Site tools Presentation

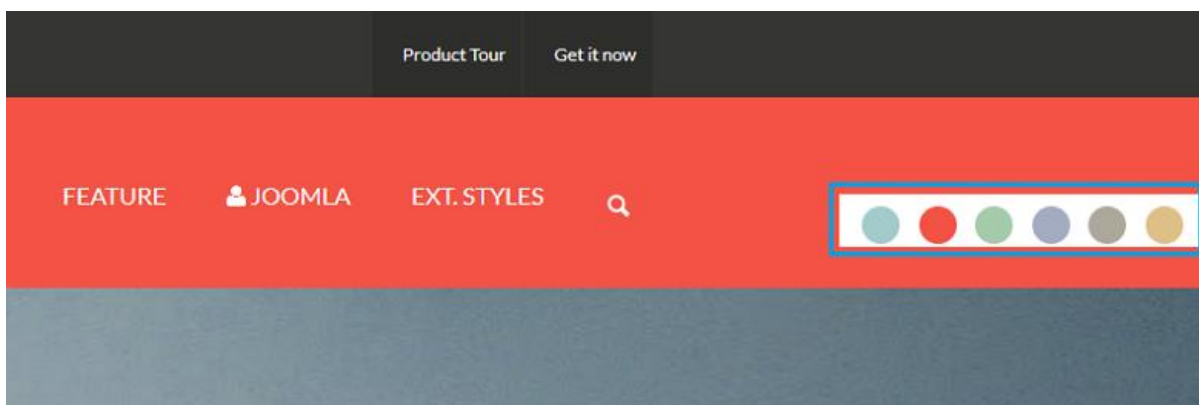

You have two options to present Site tools and one option to hide it.

#### As Menu

With this option, all color selected are elegantly arranged in the submenu panel. The drop-down animation, transparency and background color settings will be inherited from the Main Menu settings.

#### Inline

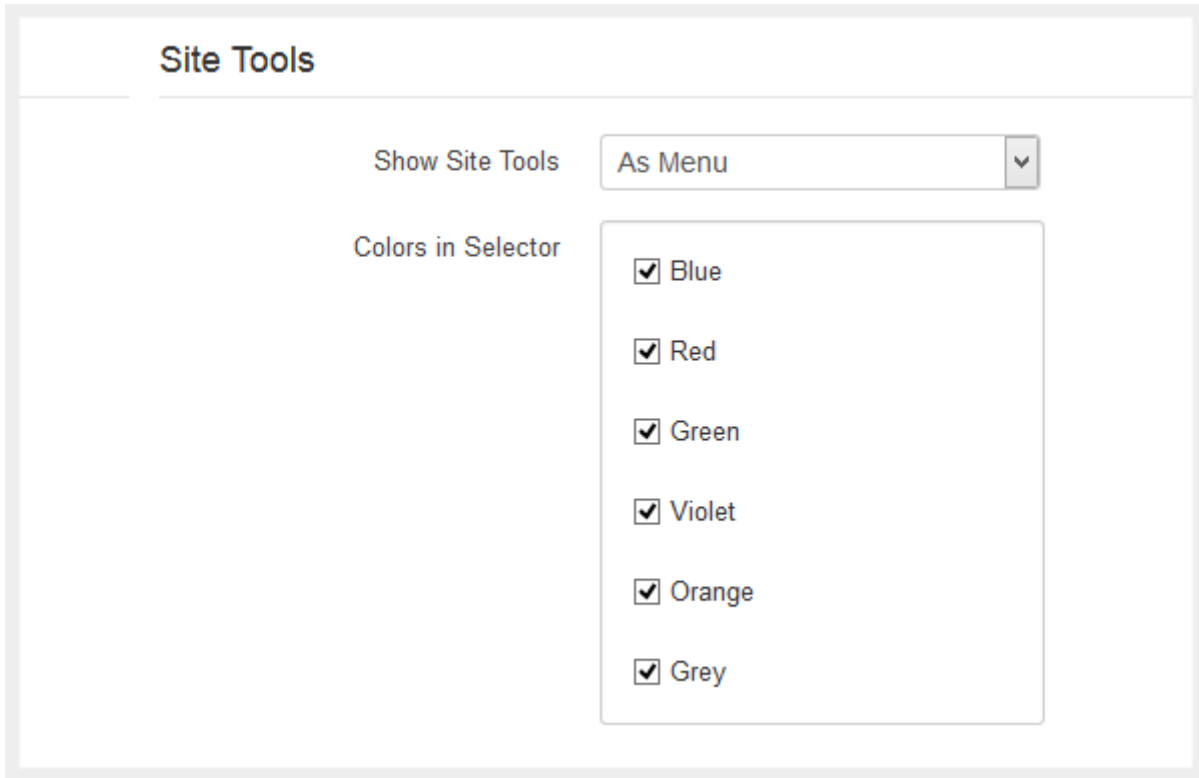

With this option, all colors selected are located directly on the main menu bar. If you want to enable only some selectors, this option is the best.

## Colors in Site tools

In the back-end, you are able to manage your site tools easily. You can choose which colors to be shown up and rearrange their orders, as you want by ticking or dragging then dropping the applicable checkboxes.

The screenshot shows the 'Site Tools' configuration panel. At the top, the title 'Site Tools' is displayed. Below the title, there are two main sections. The first section is labeled 'Show Site Tools' and contains a dropdown menu currently set to 'As Menu'. The second section is labeled 'Colors in Selector' and contains a list of six color options, each with a checked checkbox: Blue, Red, Green, Violet, Orange, and Grey.

Section	Option	Status
Show Site Tools	As Menu	Selected
	Colors in Selector	
Colors in Selector	Blue	Checked
	Red	Checked
	Green	Checked
	Violet	Checked
	Orange	Checked
	Grey	Checked

## **Video tutorial**

It guides you how to configure sitetools visually. Here are [video tutorials](#).

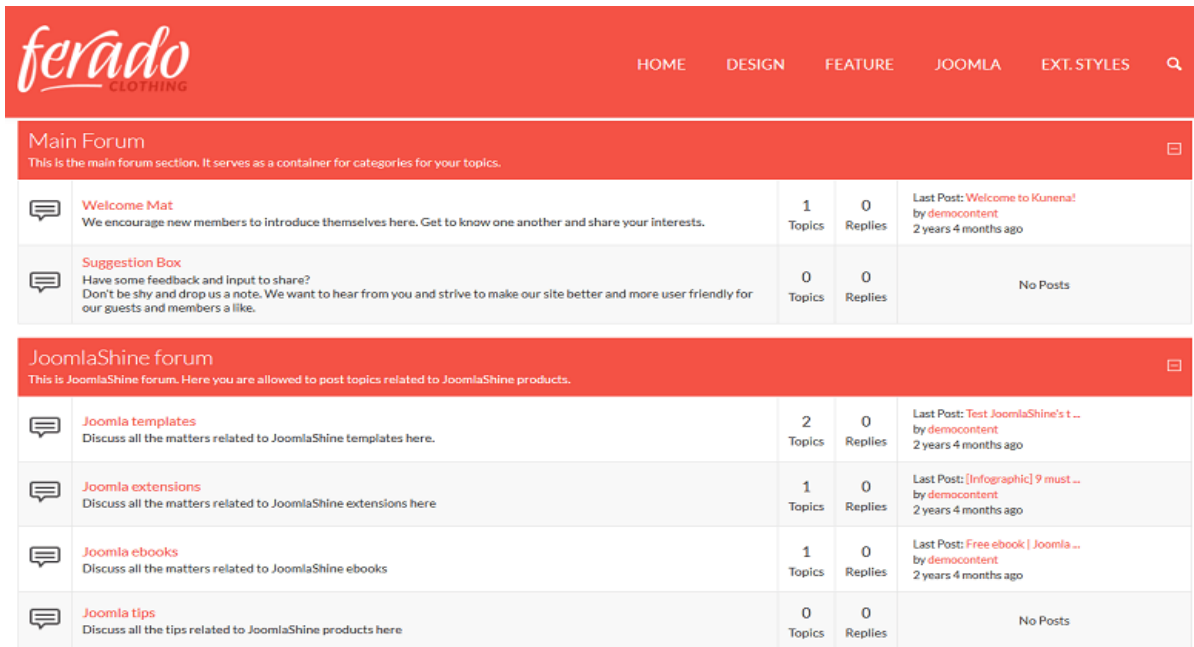

**JSN Epic** in the video is an example and these instructions can be applied to **JSN templates** as well.

## Extended styles

One of the hottest features of JSN Ferado is that it supports 2 popular Joomla extensions: **Kunena and K2**

### Kunena

Thanks to Kunena, you can create a forum easily. Now JSN Ferado supports Kunena with a Kunena Theme. You can create a forum with enhanced designs, 6 color variations, RTL support and 4 modules styled.

The screenshot displays the forum interface for the JSN Ferado theme. It features a red header with the 'ferado CLOTHING' logo and navigation links: HOME, DESIGN, FEATURE, JOOMLA, EXT. STYLES, and a search icon. Below the header, there are two main forum sections: 'Main Forum' and 'JoomlaShine forum'. Each section contains a list of topics with columns for topic name, description, number of topics, number of replies, and the last post information.

Main Forum				
This is the main forum section. It serves as a container for categories for your topics.				
	<b>Welcome Mat</b> We encourage new members to introduce themselves here. Get to know one another and share your interests.	1 Topics	0 Replies	Last Post: <b>Welcome to Kunena!</b> by <b>democontent</b> 2 years 4 months ago
	<b>Suggestion Box</b> Have some feedback and input to share? Don't be shy and drop us a note. We want to hear from you and strive to make our site better and more user friendly for our guests and members a like.	0 Topics	0 Replies	No Posts

.No posts to display

*Latest Module RTL*

**KUNENA SEARCH**

*Search Module RTL*

See other FREE Hi-Quality Joomla Templates: <http://www.joomlashine.com/free-joomla-templates.html>

## Installation

1. You install [Kunena](#) via Joomla! administration.
2. Log in the [Customer Area](#), download JSN Ferado theme for Kunena.
3. Unzip file **jsn\_ferado\_kunena\_unzip\_me\_first.zip**, then copy the folder **jsn\_ferado** to the path **joomla\_root\components\com\_kunena\template**
4. Go to **joomla\_root\components\com\_kunena\template\jsn\_ferado\language**, copy the file **en-GB.com\_kunena.tpl\_jsn\_ferado** and paste it in the folder **joomla\_root\components\com\_kunena\language\en-GB**
5. Go to the website backend => **Component** => **Kunena Forum** => **Template Manager** => **Set JSN Ferado** as default.

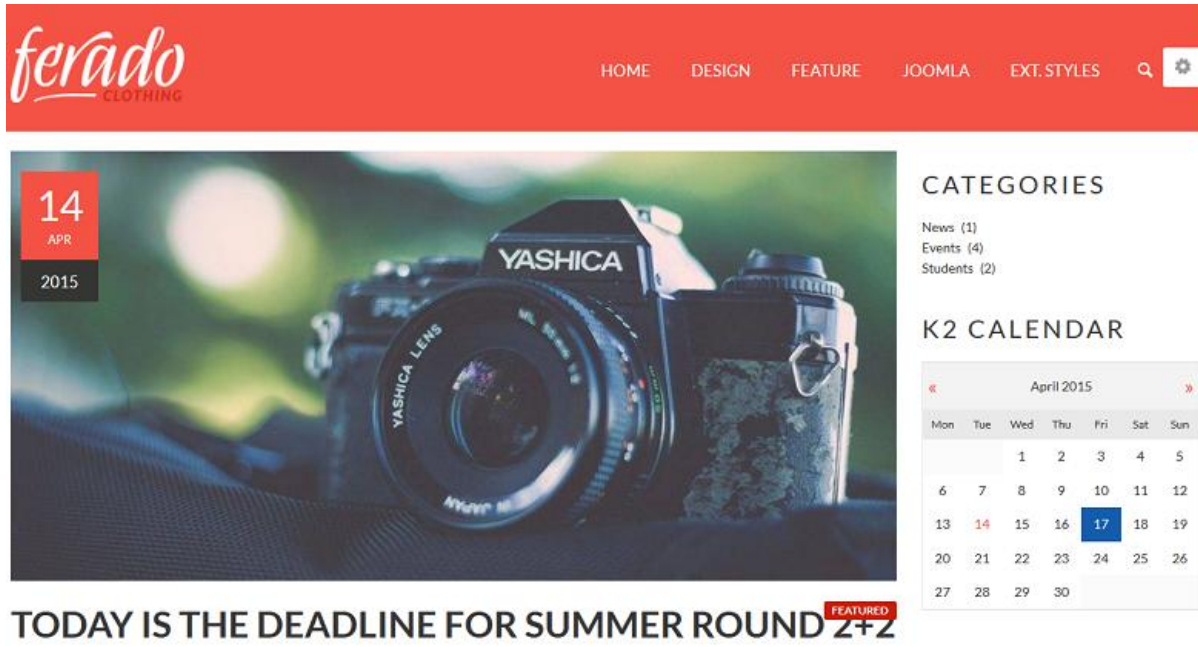

Now you have the JSN Ferado theme on your website.

## Attention!

Kunena is not included in the JSN Ferado template package. You can download Kunena freely at <http://www.kunena.org/>

## K2 Support

Here is how K2 and JSN Ferado combination looks like. You can see all **K2 components** such as K2 Comment, K2 Content, K2 Users, Tag Cloud, Article, etc. work well with JSN Ferado.

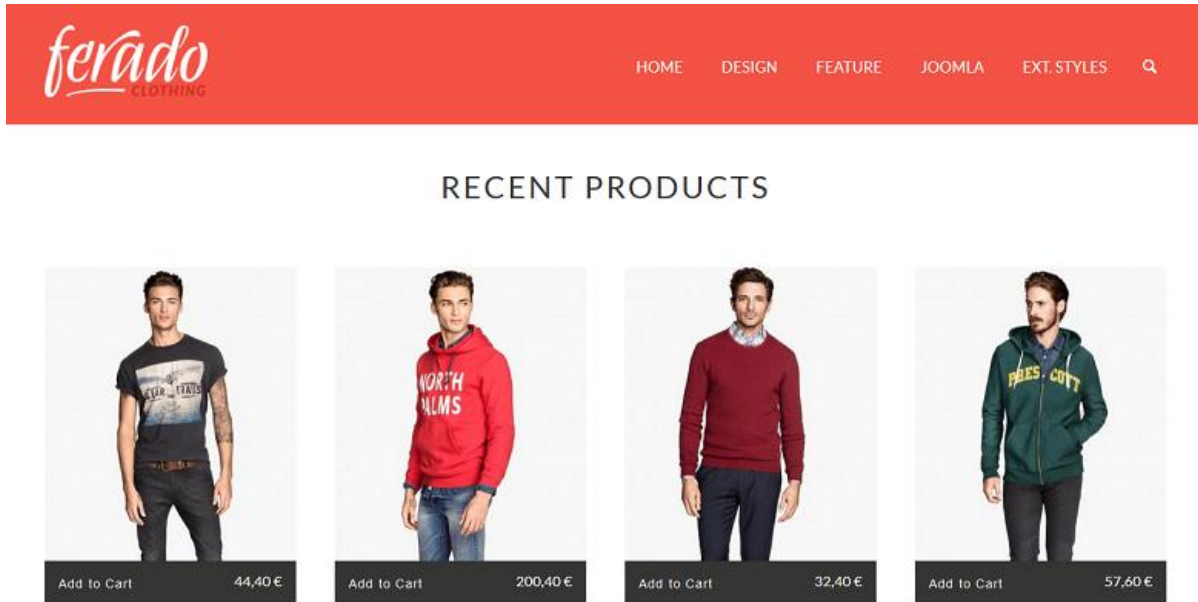

*JSN Ferado is fully supported K2 style*

## Attention!

K2 is not included in the JSN Ferado template package. You can download K2 freely at <http://getk2.org/>

## VirtueMart Support **PRO**

Thanks to VirtueMart, the awesome component which lets you to turn articles into products, your online shop never be easier to manage. Here is how VirtueMart appears with JSN Ferado template

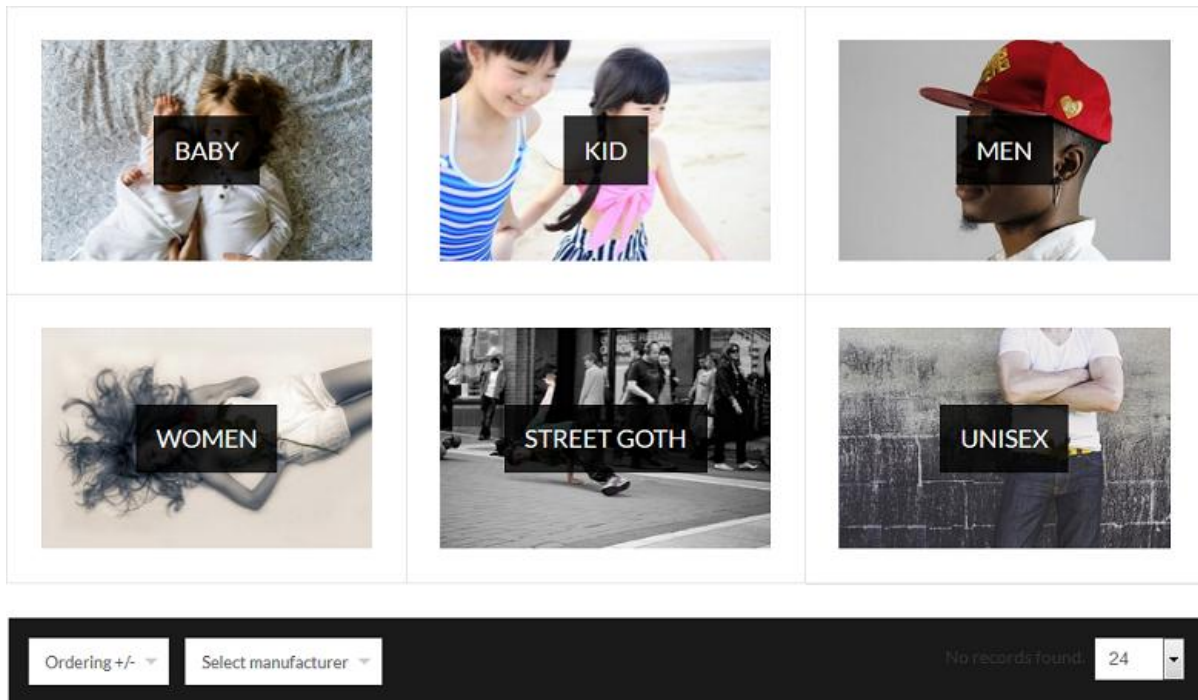

### *VirtueMart Component*

## **Attention!**

VirtueMart is not included in the JSN Ferado template package. You can download VirtueMart freely at <http://virtuemart.net/>

### Style category layout

VirtueMart makes you easily to classify the products in categories.

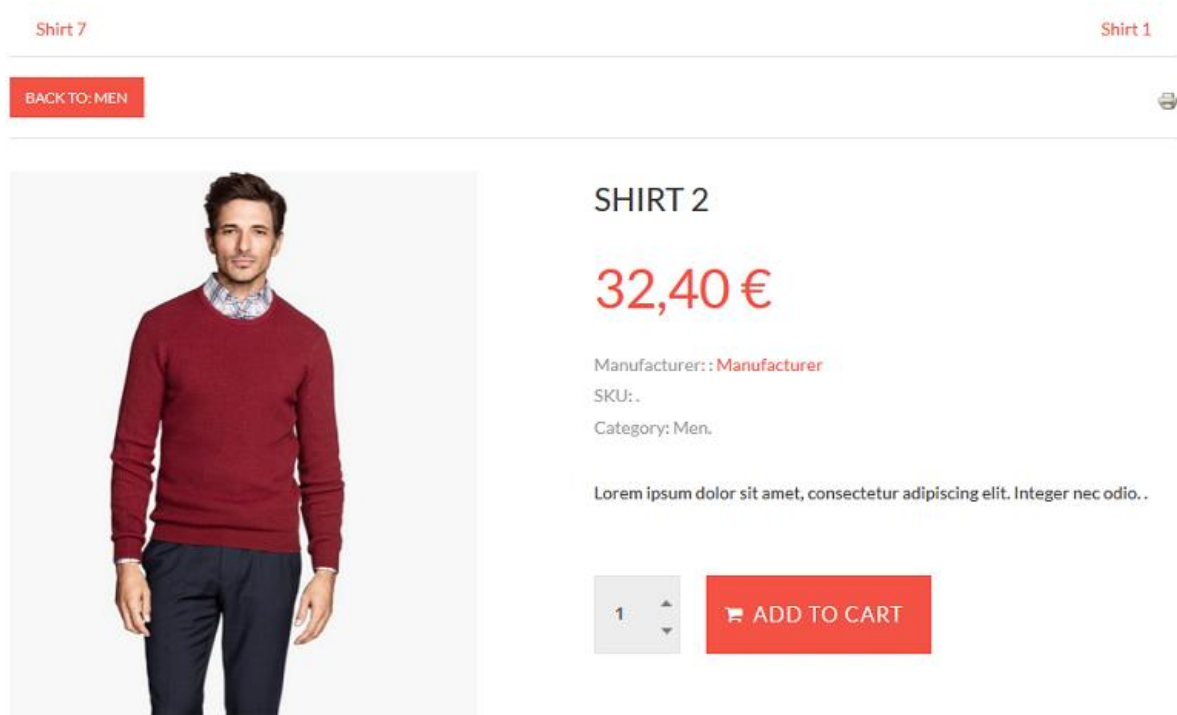

*Product categories*

## Products detail

With VirtueMart, customers can visually view the details of products after clicking a product item among products in category.

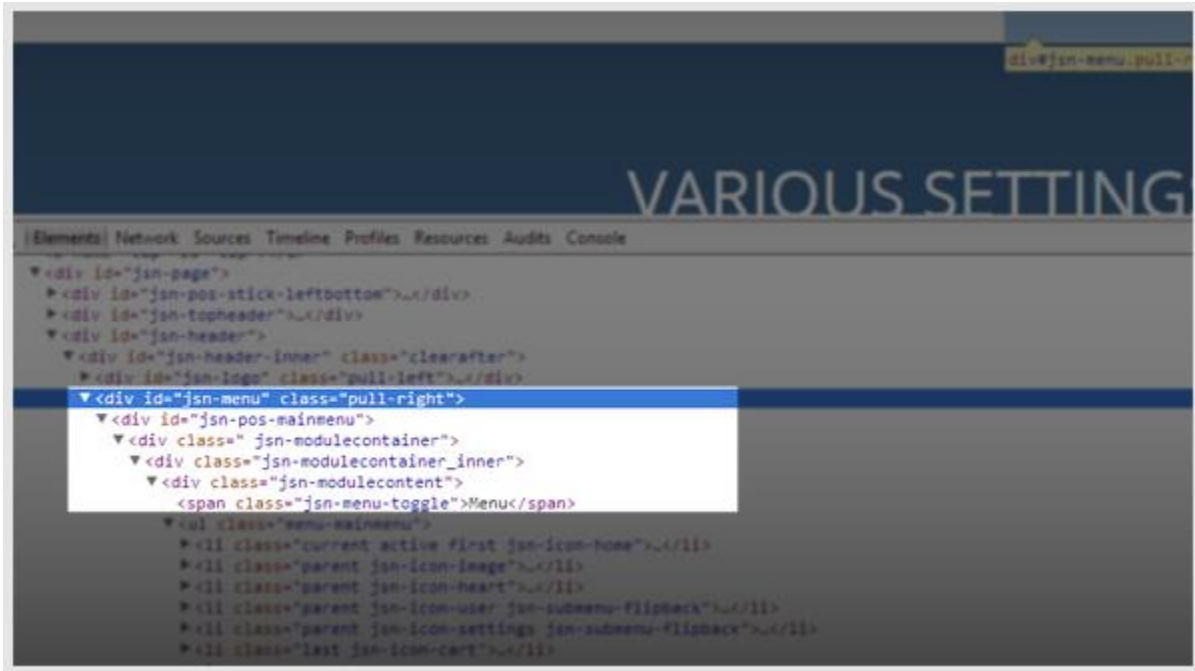

### *Product detail*

Please refer to this video tutorial on how to configure VirtueMart with JSN Ferado: [Click here](#)

## SEO & System

### Source ordering

One of the most important SEO techniques is to make sure that search engines can find your critical content before others. To make this possible, in our template code structure we generate the **“center”** part first and only after that **“left”** and **“right”** columns.

In this way, you can be sure that search engines will see your critical content first. You can use Lynx browser both [online](#) or [offline](#) to make sure of that.

## “Go to top” Link

um dolor sit amet, consectetur adipiscing elit. ices tortor interdum arcu tristique, tincidunt massa luctus. Nunc vitae lorem sodales, rhoncus aae, tempor purus.

Nunc porta cursus leo sit amet ultricies. Donec aliquet orci sed ipsum imperdiet bibendum. Quisque in urna nec leo congue ullamcorper eget id dui. Proin a dictum diam. Nam porttitor augue tellus, in porttitor ipsum tempor iaculis.

This feature allows you to put '**Go to top**' link at the bottom of page. It will smoothly scroll your page to the top, which is nice and good for website usability.

## Auto icon link

### SEO & Accessibility

Enable 'Go to top' link  No  Yes

**Enable Auto Icon left  No  Yes**

Enable Printing Optimization  No  Yes

### *Enable Auto Icon links*

If you enable this feature, the icons will be automatically attached to links based on the link url.

## Printing Optimization

This feature will give your website visitors a totally optimized page for a printer with only the important content included. This is very useful when you want your website visitors to be able to print only the main content of the page and nothing else like the side-column content, etc.

### TOP 5 NEW YORK STREET STYLE TRENDS

Super User Events 14 April 2015

font size

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nunc ultrices tortor interdum arcu tristique, tincidunt volutpat massa luctus. Nunc vitae lorem sodales, rhoncus mauris vitae, tempor purus. Sed laoreet tristique lectus, sit amet aliquet ex hendrerit sit amet. Fusce ultricies non lacus eget dictum. Phasellus nec pharetra magna. In leo arcu, auctor a sagittis sit amet, laoreet eu dolor.

*Before printing optimization*

## Top 5 New York street style trends

Events

14 April 2015

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nunc ultrices tortor interdum arcu tristique, tincidunt volutpat massa luctus. Nunc vitae lorem sodales, rhoncus mauris vitae, tempor purus. Sed laoreet tristique lectus, sit amet aliquet ex hendrerit sit

### *After printing optimization*

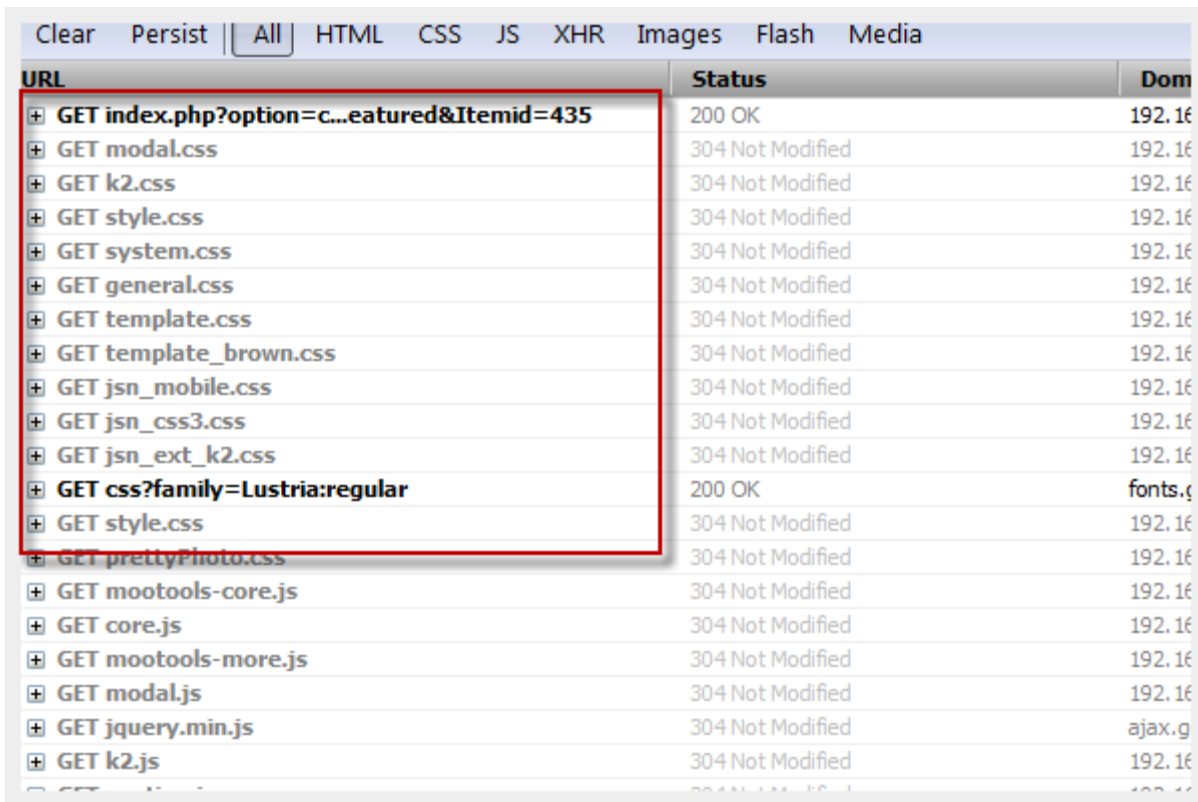

As you can see on screenshots, not only the content is simplified, but also the styling is optimized to get pure black on white ready for printing page.

At anytime, you can turn this feature off so the whole page will be output to a printer.

## CSS/JS Compression

At JoomlaShine.com, we put great effort into optimizing our templates performance with multiple techniques like image sprites application, clean html code output and now one new step – **CSS/JS Compression**.

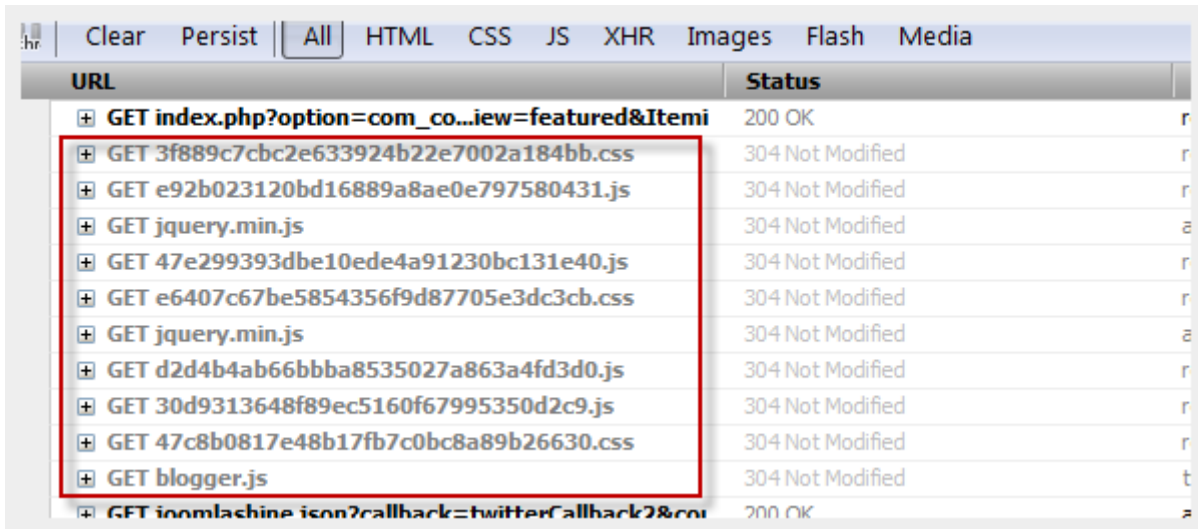

What it does is combining all continuous CSS/JS files into compressed files and delivering it in GZIP compressed state to browser. The order of CSS/JS files is the same before and after the compression.

URL	Status	Dom
+ GET index.php?option=c...eatured&Itemid=435	200 OK	192.16

*After enabling CSS/JS compression*

This feature significantly reduces http request number to server as well as overall loading size, which results in 35% performance boost.

You can configure the compression settings in the section **“Assets Compression”**:

1. **Compress CSS/JS:** Allows you to select to compress both CSS and JS, Only CSS, Only JS or nothing.
2. **Max File Size:** Defines the maximum size a compressed file should be.
3. **Exclude from compression:** Set a list of files you don't want to be compressed.
4. **Cache Directory:** Specify the directory for storing compressed CSS/JS files.

## Analytics Code

This feature allows you to present any analytical code on your website HTML code by template parameter without having to edit **index.php** file.

### Analytics Code Position

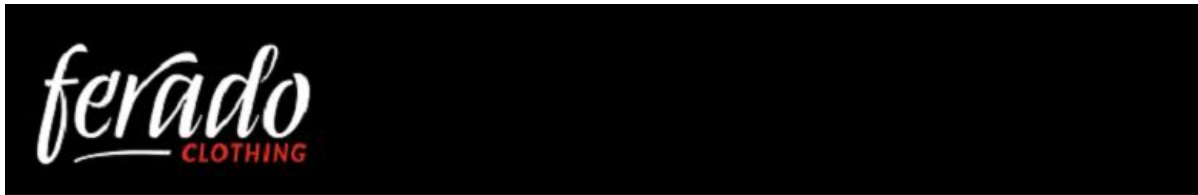

You can define where to insert the code by template parameter **Analytics Code Position**. There are two options to choose from:

1. Before ending ...**</head>** tag
2. Before ending ...**</body>** tag

## Custom 404 Error Page

The default error page comes from Joomla! is super ugly and sure to scare people away from your site at first glance, so with JSN Ferado, it provides a clean and good looking **Custom 404 Error** page for your need.

# 404 Error

## Custom Offline Page

The default Joomla! offline page hasn't changed much since the old days and doesn't really look good. Therefore, we provide a **Custom Offline** page with professional and easy to customize your own way.

## Custom CSS File(s)

This feature allows you to load multiple custom CSS files among with template default files. If you enable **CSS/JS Compression** feature, all custom CSS files will be compressed as well. This feature is very useful, when you have special dedicated CSS file for content styling.

The screenshot shows the Joomla! configuration interface for the JSN Ferado template. The 'Custom CSS File(s)' field contains two entries: 'custom-css-file-01.css' and 'custom-css-file-02.css'. Below this, a table lists the loaded CSS files and their sizes. Two red arrows point from the custom CSS file names in the configuration field to their respective entries in the table.

File Name	Size
GET style.css	494 B
GET template.css	67.8 KB
GET system.css	1.4 KB
GET general.css	2.7 KB
GET template_blue.css	6.4 KB
GET custom-css-file-01.css	6.6 KB
GET custom-css-file-02.css	10.6 KB

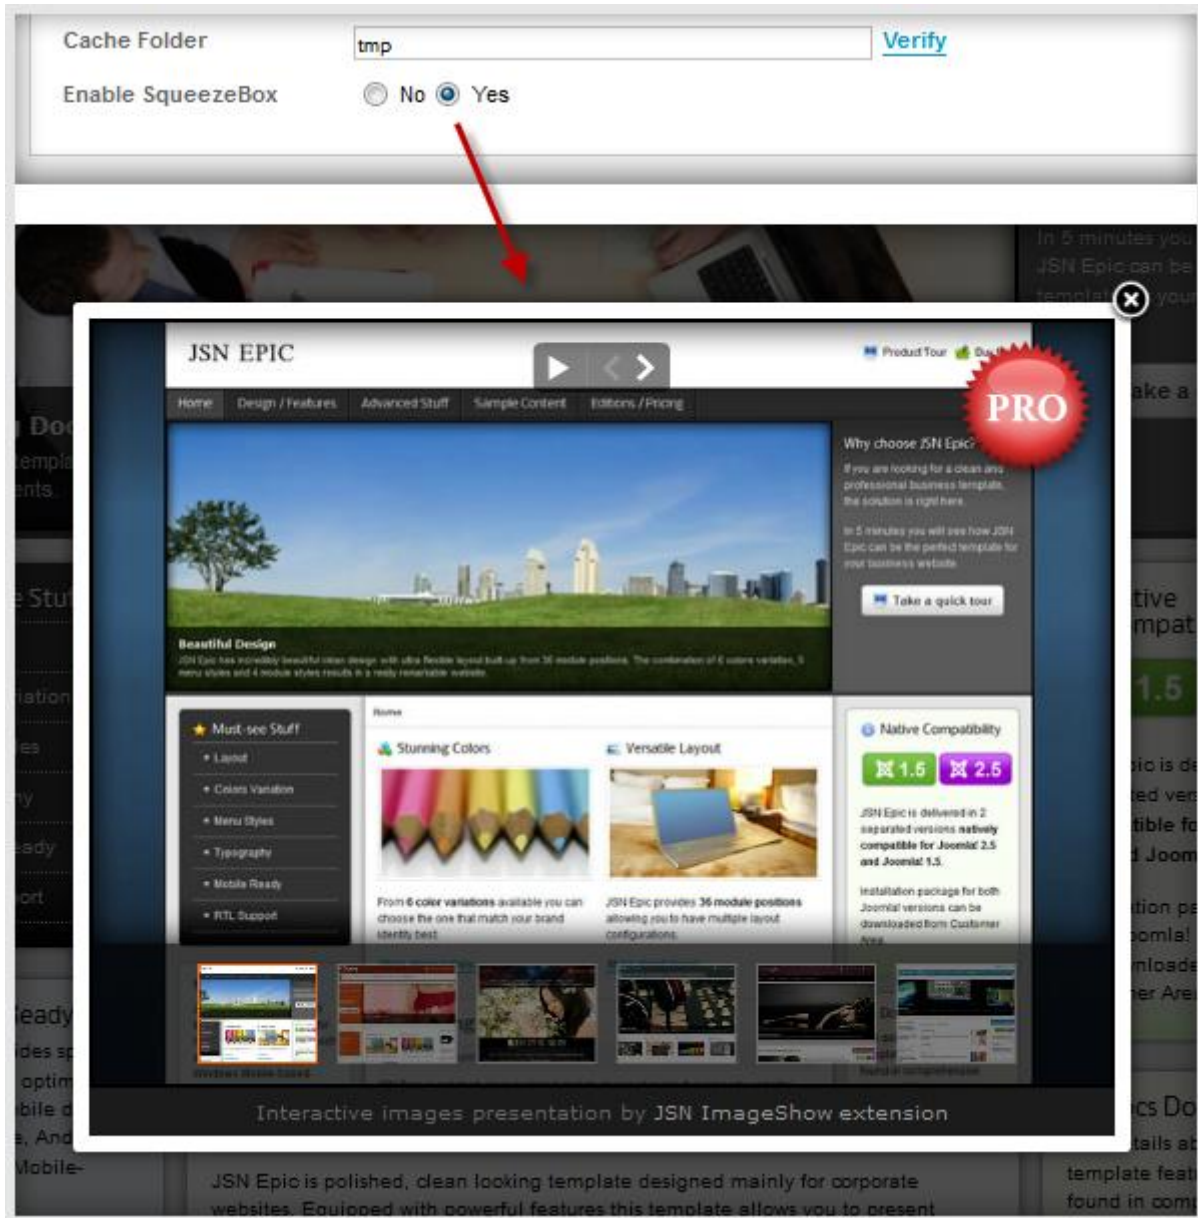

9 requests      138.9 KB (121.7 KB from cache)

*Custom CSS files are loaded with other template CSS files*

Just put custom CSS files to template's CSS folder and define them in template parameter **Custom CSS File(s)** each file name at a line.

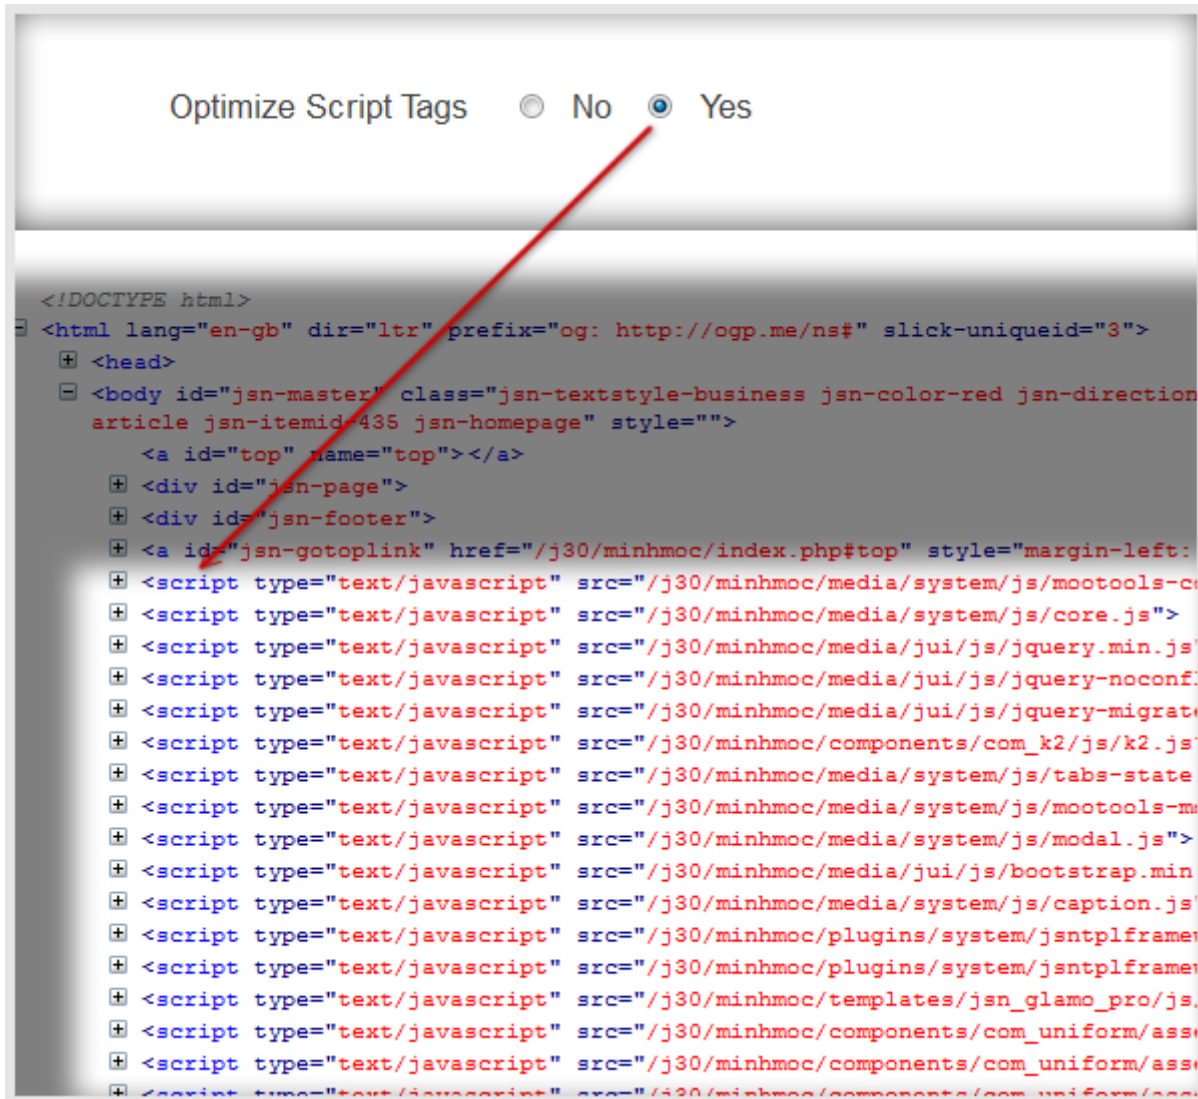

## SqueezeBox

By default, Joomla supports pop-up modals. However, some Joomla versions don't support it. The parameter **Enable SqueezeBox** helps you display pop-up modals with all Joomla versions.

## Optimize Script Tags

JSN Ferado allows you to optimize script tags. When you enable the parameter “**Optimize Script Tags**” in the tab **SEO & System**, all script tags will be moved from head section to the end of body section.

## **Video tutorial**

It guides you how to configure SEO & System visually. Here are [video tutorials](#).

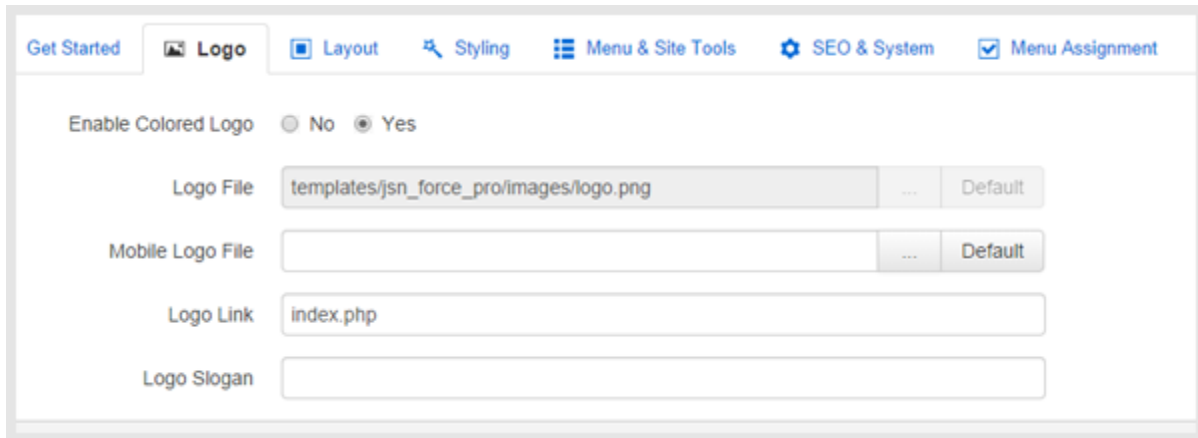

**JSN Epic** in the video is an example and these instructions can be applied to **JSN templates** as well.

## Multilingual support

In our templates, all wordings of both back-end and front-end are moved to separated language files, so you can easily translate them into any language you want. More information about how to make your own translation can be found in **JSN Ferado Customization Manual**.

Currently our templates support **14 primary languages** with more to come in the future.

## Information about cookies

The [New EU cookie law](#) states that website visitors, subscribers or users **must be provided with clear and comprehensive information about the cookies**: Names, purposes, and storage time and access permission.

So in this part, JoomlaShine provides you with the information about cookies that JSN Ferado gets from customers.

Type of cookie	Data collection	Purpose to use	Cookie session
jsn_ferado_pro-color	Color	Save the color which is selected in the Site Tools	Yes

*JSN Ferado cookies*

These cookies are **used to store text value** for all the JSN Ferado functions, to make sure that JSN Ferado runs smoothly. Cookies will be **stored in a user's web browser directory** while a user browse a website and **only be removed when users clear cookies**.

## What's next?

Now as you have learnt every feature of the template, it's time to move on and customize it to your needs. Go ahead and open the next documentation coming with the JSN Ferado package called **JSN Ferado Customization Manual**. In this manual, you will find a detailed description about how to customize every bit of the template to make it suit your needs.

You can download the full documentation package and print for convenient reading.

[For newbies] Download free e-books to build Joomla! websites

*2 Free E-books, written by JoomlaShine Team*

Building a Joomla website is a challenge with a lot of Joomla! newbies. To help you do this task more easily and quickly, JoomlaShine team released 2 FREE e-books: **Joomla! 2.5 Made Easy** and **Joomla! 3.x Made Easy (updated with Joomla 3.4)**. Thanks to them, you get useful manuals whatever Joomla! version you use: Joomla! 2.5 – in 3 languages: English, German or Danish or Joomla! 3.x, - in 5 languages: English, German, Danish, Spanish or Vietnamese.

Both of them include 7 chapters as following:

- Get to know about Joomla! CMS
- Install Joomla! on local host
- Create content for your site
- Customize website appearance with a Joomla! template
- Arrange modules in positions
- Extend your website functionality with Joomla! extension
- Manage your Joomla! websites with JSN PowerAdmin
